<b>Résumé:</b> (traduction alternative) Short canyon open and facing the sun		
<b>Hydrologie:</b>		
<b>Accès:</b> (traduction alternative) Leave the Italian freeway at Pontebba, cross the SS13 after the toll station and after about a kilometer of driving you will find yourself in the valley town of San Leopoldo. There you will find a gravel parking place directly under the freeway on the north bank of the Fella, at the eastern exit of the village.		
<b>Approche:</b> (traduction alternative) Pass under the highway onto the embankment of the bike path. On the orographic left side of the canyon begins directly from the bike path a path over the grids of the slope protection. At the fork, after about 40hm, keep to the right. If you don't find it, try to gain altitude "cross-country" on the clearing of the old cable car route. At the latest at the ridge of the conquered hill you will find old trenches from which a recognizable path to the northwest leads back down into the canyon. You could also ascend orographically to the right via the hiking trail shown in red on the Tabacco map and walk the drilled right side arm. However, the access is extended by at least another hour, you would have to do without 2 beautiful, high rappels and find a mostly dry streambed. For canyoning, the tour described here is much more rewarding. Historical background: this area was a restricted NATO military area until 2003. From the access path you can easily see the mountain station of the cable car.		
<b>Tour:</b> (traduction alternative) The tour starts with a 40m rappel, followed by 7 more rappels < 25m. There are hardly any jumps and slides and also swimming sections are not to be found here. Because of the southern orientation and the openness, this canyon can be safely visited early in the year.		
<b>Retour:</b> (traduction alternative) At the exit of the tour you are back under the highway and it is not 5 min back to the parked car.

Beautiful open canyon, ideal in the transition period or after rainfall. We renewed the rope on the 3rd rappel. All stands ok (traduction alternative)

First time in this canyon and I have to say I quite liked it as a short tour. Many small pools would have been possible with jumps, sometimes the light gravel with the water depth is a bit deceptive. We played it safe and just rappelled down. As I said, the 3rd belay could do with a new one. (traduction alternative)

Here for the third time. I find the tour ideal on a sunny spring day (or after a lot of rain); access is not such an issue; somehow/where all paths meet again and again > just head upwards ;-). Stands so far all OK; the third stand (about 25M) could be renewed if someone has a drill with him (4 anchors, one wobbles, all connected with old tapes). Today even 2-3 jumps possible (traduction alternative)

Tour committed on 1.4.2023. Very beautiful especially in spring. South orientation. Highest rappel 35m. Stands so far in order (traduction alternative)
