Matériel: Cordes: 2x40m		
Résumé: (traduction alternative) Forest canyon with a lot of wood		
Hydrologie:		
Accès: (traduction alternative) From Annecy on the N 508 along the southwest shore of the lake of the same name via Duingt to the south end of the lake at Bout-du-Lac (17 km from Annecy). 2 km further on (i.e. after 19 km from Annecy), the D 909 branches off to the left in a northerly direction to lead to Talloires on the eastern shore of the lake. But we turn off in exactly the opposite direction to the south and always drive along the little river Ire to the east past the village of Doussard, later to the east (below) the hamlet of Chevaline into the Combe (= canyon) d'Ire. Park your car in the large parking lot in front of the barrier (approx. 6 km from N 508).		
Approche: (traduction alternative) We continue on the forest road, not up the hairpin bend on the left, but along the orographic. right bank of the Ire. We cross the Ire and the track now goes steeply uphill. We finally reach a stone building (Refuge Fayard) with a well in front of it. From here we go eastwards to the stream and follow it downwards on the left bank until the entry presents itself.		
Tour: (traduction alternative) Forest canyon, mainly for nature-loving "collectors", poorly secured, water cold, a lot of wood (2009), after the narrower part at the beginning emergency exits possible.		
Retour: (traduction alternative) After the higher rappels towards the exit of the tour (28 m/13 m/40 m/15 m) you walk further down in the streambed and overcome 2 smaller steps. Then a little stream walks towards you from the right. This is the Ire. The French book and the internet site describe an exit by walking up the Ire against the direction of the river until you reach a ruined footbridge and a path that leads up to a forest road in eastern direction. Following this downhill, you come back to the parked car. Alternatively, it is possible to follow the Ire in the streambed downhill to the bridge. In doing so, a higher waterfall at the edge can be downclimbed. Another variation while going downhill would be to leave the Ire at a v-shaped gulch up to the left on a relatively clear track. You then come to an open area (after logging), follow the track (beginning at the northeast edge of the clearing) high above the Ire northward until you see a dirt road above on the left. Up to this, it leads to the ascent track and on this back to the car. In this last variant you need some "feeling" for the path finding.
