Résumé: (traduction alternative) Water rich rappel canyon		
Hydrologie:		
Accès: (traduction alternative) Take the A1 (via Milan) or the A21 (via Brescia) to Piacenza (southern exit). On a bypass to the south around the city, then on the SS 45 through the Val di Trebbia via Bobbio to Marsaglia. Before the bridge, turn left onto the SP 586 ('Chiavari'). After km 9 you pass through a tunnel, immediately after which there is a storage area for road debris on the left. Here you can park one car. With the other car, continue for about 500 meters and then turn left towards Casale - Brugnato. After 2 km (measured from the junction), in a bend to the right, there is a place to park on the left. It is overlooked by an overgrown rock. Here the road turns away from the Rio Grande to exit a side valley.		
Approche: (traduction alternative) Just before the rocky hill, the path descends to the Rio Grande. The entry is at the confluence of Rio Grande and Rio dei Boschi coming from the right (east).		
Tour: (traduction alternative) Only 2 to 3 rappels (attractive the one with 20 m) short canyon. There was not much left of the earlier slides and jumps (after high water). At the bottom of the streambed there is a warning sign 'sluice opening', but the dams in the upper reaches are supposed to be slide brakes only. The Rio Grande could be well connected in time with the Colombaia. The canyon is also commercially walked ('Spity Gonzales').		
Retour: (traduction alternative) Immediately by the lower parking lot.
