Pays: Schweiz / Switzerland Région: Kanton Tessin / Cantone Ticino Sous-région: Bezirk Locarno Ville: Loco		
Difficulté: un peu difficile	Niveau: v4 a3 III	Temps total: 3h45
Temps approche: 10min	Temps tour: 3h	Temps de retour: 35min
Altitude d'entrée: 685m	Altitude de sortie: 440m	Altitude du delta: 245m
Longueur du canyon: 450m	Rapelle le plus haut: 50m	Nombre de rapelles: 13
Transport: à pied	Type de roche:	Zone de prise d'eau: km ²
Saison: mai - octobre	Orientation: Sud	Meilleur moment: 10-15 Heures
Évaluation: ★ 3.8 (2)	Info: ★ 2 (1)	Belay: ★ 0 ()
Spécialités:		
Matériel: Cordes: 2x 60m		
Résumé: (traduction alternative) Short tour; best time is in the afternoon; beautiful polished rock walls, dark pools, technically challenging abseils in the watercourse, some slippery spots, difficult exit.		
Hydrologie:		
Accès: (traduction alternative) From Biasca take the highway to Locarno --> take the exit to Lorcano Centovalli-Valle Maggia,-Onsernone--> continue towards Ponte Brolla at the bridge turn left over the Maggia to Onsernone--> at the exit of Cavigliano turn right on the winding mountain road to Loco--> at the end of Loco look for a parking place after the bridge (canyon) (few parking places available).		
Approche: (traduction alternative) After the bridge, follow the trail above the bus stop-->after the first switchback, a path leads down to the stream (700Hm)		
Tour: (traduction alternative) The Loco is up to the first exit possibility (shovel turbine) rather short, but beautiful and entertaining --> you have overcome the first small steps of the canyon comes already the highest rappel point (about 50m) which is located after the road bridge --> the stand is very exposed and is reached by means of a rope traverse --> there follow 2 short rappel and a slide, before you stand in front of the beautifully polished narrows --> here no way around! (rappel directly in the water course) --> after that there are 2 nice pools and a rappel point, where you have an exit possibility after the 2nd pool on the left (fixed rope) --> if you don't get out here, you have another rappel point -->the last few meters are rappelled before you stand in front of the small self-built paddle wheel --> according to the info, the 2nd (lower) part is not worthwhile, so we got out here (at about 510Hm). (Exit 1) --> if you go further there are more exit possibilities. Exit 2: Before the 45 m drop into the Isorno, Exit 2: rappel into the Isorno.		
Retour: (traduction alternative) Before the last 45 m drop into the Isorno, there is a small old mill on the left (Exit 2). From here, a dilapidated path leads steeply up to the site in 45 min.\nAnother exit option is to still rappel the last fall, then climb or swim about 600 m downstream in the Isorno to a footbridge and then climb up on the left along the path. (Exit 3)		
Caution at Exit 3 through the Isorno. The Isorno has an automatically controlled water catchment (+41 91 756 66 15)
