<b>Spécialités:</b>		
<b>Matériel:</b> Cordes: 2x40m		
<b>Résumé:</b> (traduction alternative) Rather open lime canyon with several small abseils; about 1.5Km catchment area; mostly little water; except for the final waterfall, the upper part is more beautiful and continuous; can be combined with Rio Ronc; some entanglements in the lower part of the canyon; as belays serve bolts with slings, single bolts, tree slings and chain anchors (on our ascent everything was ok); several emergency exits possible; south-western exposure.		
<b>Hydrologie:</b>		
<b>Accès:</b> (traduction alternative) about 20min. Between Chiusaforte and Carnia is the village of Resuitta. From here you drive into the beautiful Resia Valley. Follow the road with the sign "Stolvizza" (P.s. From the sign Resuitta to Stolvizza is 9Km). In Stolvizza you can either park directly at the parking place for hikers (wooden sign "Ta Lipa Pot") next to the pizzeria or you follow the road for about 50m and park at the parking place for hikers (Pusti Gost/ Belvedere) on the left side.		
<b>Approche:</b> (traduction alternative) approx. 50min. From the parking lot ("Pusti Gost/Belvedere") follow the signs to "Pusti Gost/Belvedere". First you walk on the road which ends at the picnic area with small wooden huts. Here you take the path over the small wooden bridge further up to the left. You will pass 3 concrete water houses. At the third water house (blue arrows) you could climb to the stream for the lower part. For the upper entry follow the path for about 20-25min further up, past the small Jesus cross to the wooden bridge at about 920m. P.s. If you want to check the water level at the last rappel before the ascent, follow the trail at the pizzeria parking lot (wooden sign) " Ta Lipa Pot" for about 5-10min.		

**Tour:** (traduction alternative)

approx. 3-3,5h

Directly at the wooden bridge at about 920m we start with the first rappels. The steps vary between 5 and 25m. Since the stream usually has little water, the abseils, almost all of which are through the stream, should not be a problem. The first nicer part (about 10 rappels) to the middle entry/exit (left) is more continuous than the second. In the second part there are again about 10 abseils (up to max. 35m) interrupted by walking and downclimb parts. Towards the bottom the canyon narrows shortly before you reach the open last and most beautiful cascade. Here you first rappel 15m to an intermediate belaystation and then another 35m in the water (Attention! Exit from the first pool to the intermediate rappel is difficult without fixed rope ☐besser before the pool rappel to the right to the intermediate rappel). The cascade can also be bypassed on the right. After the last abseil point you are almost at the hiking trail at about 600m.

**Retour:** (traduction alternative)

approx. 10min

Follow the trail "Ta Lipa Pot" on the left side, which will lead you back to the parking lot in the village shortly.
