<b>Résumé:</b> (traduction alternative) Descent in pink granite and dark pools. Short and long version possible.		
<b>Hydrologie:</b>		
<b>Accès:</b> (traduction alternative) From the N-196 (Ajaccio / Sartene / Bonifacio) at Propriano turn onto the D-257, after about 3.5 km turn right again onto the D-557. Via Burco we come to the hamlet of Martini (another 5 km), where we park one car. With the other we continue uphill (again 3 km), until at a road entrance to the right a shady parking area appears.		
<b>Approche:</b> (traduction alternative) From the road go right(O) down the path, after 30 m turn left, first northeastward, later eastward down to the stream.		
<b>Tour:</b> (traduction alternative) Somewhat gloomy canyon with many possible slides and jumps. Since the pools are dark, prior verification is appropriate. The canyon can also be walked in short (so is the commercial use).		

**Retour:** (traduction alternative)

There is no clear exit point and also the way back is quite cross-bed. \nThere is also  
<http://lescanyonantes.net/fiche-details.php?nom=Le%2520BARACCI> (website no longer accessible): "La sortie du canyon est peu évidente à trouver. Le topographic view étant très peu clair à ce sujet: '30min après passage de grotte en paroi, lorsque la gorge s'élargit remonter à qui mieux-mieux dans le maquis en RD'.Mouais, effectivement, env. 30 min après la grotte, la gorge s'élargit, un cairn est même là, un pseudo sentier part sur la droite, mais ce n'est PAS la sortie. En faisant ainsi, nous nous sommes arrivés sur une crête, après avoir grimpé dans le maquis tels 2 sangliers pendant 40 minutes, pour découvrir la voiture séparée de nous par une nouvelle descente en pleine végétation, et une remontée similaire.Attendez donc que la gorge s'élargisse très largement avant de remonter, considérez les cairns rencontrés avec prudence (nous ne sommes pas retournés le supprimer). Au bon endroit, la gorge est très nettement plus large, et la remontée est exempte de toute barre rocheuse". I too went up to the right too early on my first ascent and then stood at the top of a saddle where it went down vertically beyond 100m. \n\nAlso: When the canyon widens about 30 min. after passing a grotto in the rock face, you may see a large cairn on the orographic right bank. Do not turn right up the steep cirque here, but continue along the stream until you reach the ridge in an almost flat terrain in a slightly ascending westerly direction and here a faint trail. Follow this on the ridge to the right in a northerly direction until you can easily cross on sight in a westerly direction to the hamlet of Martini.\n\nBecause the residents there then also like to cause trouble if you climb up to the road near their houses, it is perhaps easier to walk further downhill in the Baraci and get off (to the right) where the hiking trail "Mare e Mare Sud" crosses the stream. Additional time required - estimated - 45 min.\n\nThe "lower car would then also be parked further down in the hamlet of San Quircu, where the trail meets the road.

Today in great conditions - access directly at the high ropes course - Hanen did the first part - after the C13 got off directly to the right - about 10 min back to the road (traduction alternative)

The access, as mentioned below, is now through the ropes course by an obvious trail, the canyon is fantastically equipped and the water was warm, the parking, a few turns below the high ropes course has a good path leading to the exit, orographic right after C13 (see photo), the path is a steep rocky climb which would be easy to miss.

Parked at the hairpin bend and walked to the high ropes course, then down to the stream. Get off right after the Tyrolienne ropes. Very popular with tour operators in summer. The lower part with 2 cascades is very beautiful, but very long to walk. (traduction alternative)
