Pays: Italia / Italy Région: Piemonte Sous-région: Verbano-Cusio-Ossola Ville: Calasca		
Difficulté: un peu difficile	Niveau: v4 a2 II	Temps total: 2h5
Temps approche: 3min	Temps tour: 2h	Temps de retour: 2min
Altitude d'entrée: 650m	Altitude de sortie: 525m	Altitude du delta: 125m
Longueur du canyon: 400m	Rapelle le plus haut: 45m	Nombre de rappelles: 8
Transport: Voiture facultative	Type de roche: gneiss	Zone de prise d'eau: km ²
Saison:	Orientation: Sud-Ovest	Meilleur moment:
Évaluation: ★ 3.7 (7)	Info: ★ 3 (4)	Belay: ★ 3 (4)
Spécialités:		
Matériel: Cordes: 2x50m		
Résumé: (traduction alternative) Beautiful short vertical gneiss gorge; several entry and exit points; above dam with water diversion, therefore mostly little water; most rappels are in water flow; very good belay stations but exposed placement; best sunlight from 11AM; good cell phone reception; ½ day hike.		
Hydrologie:		
Accès: (traduction alternative) From Domodossola on the 549 into the Valle Anzasca valley. After about 35min in Calasca Castiglione on the right side is a small pizzeria "C'era una volta" (recommended; simple and good). From here it is exactly 1,3Km to the parking exit of the Bianca. Do not park the car at the bus stop but after the bridge on the gravel parking place on the right at the E-Werk house. Small tip: in order not to have to carry up the heavy backpacks, these can be deposited at the entry before. For this you have to take the turnoff right to Calasca about 50m before the bus stop. After several hairpin bends on the left there is a turnoff to Barzona. Follow the road to the bridge (entry at 650m). After depositing the car, park it at the bottom and go up.		
Approche: (traduction alternative) From the parking lot in front of the electricity house, go back to the bus stop. Right next to the bus stop, follow the wide access road that leads past the abandoned house. The road quickly becomes an (unmarked) path, which you continue to follow over a small bridge to the mountain road. On the road you walk only briefly (about 50m) until you find the path to the left again. This leads up in the forest (next to the road) to the small village of Calasca. At the church, next to the stone fountain, you can already see the B00 Calasca Fermata Bus trail, which you follow up the road. At the junction with the other mountain road, follow the path on the left, which soon crosses the Rio Val Bianca and leads to the village of Barzona. (On the way up you can already see (or get in or out of) the canyon). Before reaching the village, follow the road down to the small bridge/chapel. (Entry at 650m)		
Tour: (traduction alternative) Rio Val Bianca is a very beautiful, short, open rappel canyon with mostly little water. If you divide the canyon into 2 halves, you have a walking and downclimb passage at the beginning, followed by possible slides and short abseils in the watercourse. In the case of a narrow chute, the water pressure in the intermediate basin can be unpleasant. At the point where you have the best view into the Anzasca Valley, the second more vertical part of the canyon begins. Here a 100m cascade leads down into the valley (30m, 20m and 45m). At the 30m abseil you get a strong shower before reaching the beautiful deep pool, (after control, last part slippery). Then follows an exposed, where you rappel about 20m right to the last intermediate stand. The last abseil point with 45m is then the highest. Attention: when pulling off the last 45m abseil point, the rope can easily jam in the boulders below.		

Retour: (traduction alternative)

After the last abseil you leave the canyon on the right side (525m). First over large boulders through an iron lattice (private). Cross the garden as unnoticed as possible without losing much height. Shortly you reach the electricity house (parking lot).
