| <b>Résumé:</b> (traduction alternative)<br>Very long tour; physically and technically very demanding; only for very experienced canyoneers; no cell phone reception; be sure to check the water level at the exit (at the 2nd water diversion); several inlets in the lower part of the canyon; steep entry/exit in the middle section (near the hiking trail); very beautiful veining and washouts in the granite rock; some pools with strong current; beware of rope entanglement; clean, cold water.  |   |   |
| <b>Hydrologie:</b>  |   |   |
| <b>Accès:</b> (traduction alternative)<br>From the campsite Solarium in Domaso (in front of Garvedona) take the road to Garvedona --> at the beginning of the village turn right to Livo (steep asphalt road) --> in the village Livo turn left to Dangri --> from the cemetery drive 2.8km on a bad gravel road to the exit of the road (limited parking before the bridge) (650Hm).<br>There is a new ticket machine on the left at the beginning of the village Livo. Price 3€, also card payment possible at the machine; you have to indicate your license plate number.   |   |   |
| <b>Approche:</b> (traduction alternative)<br>From the parking lot Dangri you go over the 2 stone bridges --> then you take the path on the right, which shortly thereafter divides --> here go up on the left to the abandoned village of Provego (940Hm) --> after the village you go over a bridge and continue up to the next houses of Pianezzola --> here follow the path above the houses to the right --> once you have left the houses behind you comes a large overgrown slope that at least offers a beautiful view of Lake Como --> at approx. 1030Hm the path clears --> follow the stone steps slightly downhill --> the path leads parallel to the canyon (entry/exit possibility) with small slopes up to the ruined mountain houses --> if you want to save the upper part (approx. 100Hm), you have a good possibility to descend over the meadow into the canyon at the big beech on the right side of the path (approx. 1200Hm) --> the actual entry is at 1300Hm after the houses.  |   |   |
| <b>Tour:</b> (traduction alternative)<br>approx. 7,5-9h<br>The Bares is certainly one of the most beautiful and longest canyons at Lake Como --> because of the cut-off and the technically demanding places as well as the cold water only experienced canyoneers should enter this canyon --> the canyon has many short demanding rappelling places whereby the pools are mostly not visible --> also jumps are to be enjoyed with caution --> without long walking passages you have a constant change of narrow places, clamping blocks and pools which can also be very turbulent --> in the middle of the canyon (approx.900Hm) one finds an open place with a large rock plate on the right side, here there is a steep emergency exit (entry) --> was in the upper part of the water volume already borderline, should be exited here, because the water level in the lower part by several tributaries still rises --> the 2. Half offers a unique canyon landscape with continuous successive abruptness --> until the last rappel full concentration is required before you get out at the water discharge --> an additional mental burden to the seclusion is the permanent noise level that you leave behind after the tour relieved. On the whole, however, a perfect canyon. |   |   |

**Retour:** (traduction alternative)

From the water drainage descend right over the metal steps and follow the path --> after about 20min there is another water drainage --> pass it until you reach the starting point (Dangri) again after another 15-20min.

Automatisch importiert von Descente-Canyon.com für Canyon Bares Ras. Superbe. On l'a fait à partir de la rechap 2. Entrée un peu tôt et le soleil est à peine rentré. Idéal vers 11h pour la partie inférieure (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21028/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Bares Débit très tranquille, équipement ok. Magnifique comme d'habitude ! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21028/observations.html>)

2023-09-11 | Tobias Beiser |★★★★☆|📖|📍☆☆☆|🌊 Normale |👍 Terminé

All hooks top. Very many jumps possible Partly a bit slippery (traduction alternative)

2023-08-02 | Patrick Summerer |★★★★☆|📖☆☆☆|📍☆☆☆|🌊 Normale |👍 Terminé

All stands secured with double adhesive hooks. Very many jumps possible. However, a few pools look deeper than they are due to the dark green color, you should not be tempted to jump in everywhere without checking. (traduction alternative)

2023-06-06 | Wolfgang |★★★★☆|📖|📍☆☆|🌊 Haut |👍 Terminé

Perfect weather for this great gorge, the hook missing during an ascent about 10 days ago can be climbed / slipped down without any problems. A few Abletterstellen because of yet "good water" difficult to climb off but all doable. (traduction alternative)
