Matériel: Cordes: 2x40m		
Résumé: (traduction alternative) Rather short tour; best time is in the afternoon; very nice pools with impressive rappels and jumps up to 15m; emerald green water; beautiful view into the valley; be careful at the sharp edges; highly recommended tour!		
Hydrologie:		
Accès: (traduction alternative) From Biasca ri. Locarno --> into the Maggia valley --> into the village Giumaglio over the bridge and immediately the first street to the right --> here li first parking possibility or follow the street to the right and directly at the bridge small parking possibility --> here you already have a view of the last rappel C40 and the water level (approx. 360Hm).		
Approche: (traduction alternative) From the parking lot, walk towards the church --> behind it, several narrow streets lead to the hiking trail that leads up to Cappella di Cima --> the stone steps go steeply up --> past the iron gate to a small stone house with fountain (approx. 540Hm) --> behind this house you have the first descent into the canyon --> 2. The second possibility is a little further up at the cottage --> follow the stone wall until you reach a steel rope and an abseil point R25 from the tree --> 3rd possibility at the 2nd cottage ri. to Camusegn and follow the path to the bridge.		
Tour: (traduction alternative) During our ascent, we walked along the stone wall at the first Wahlfahrtshäuschen until the rappel of Baum (R25) --> now you are standing in the streambed --> a short walking passage follows through a mighty rock chaos that you can easily bypass on the left --> after a basin there are further small climbs until you reach the gigantic granite boulders.> a basin there are more small rappels up to the gigantic granite boulders which are bypassed on the left via a rope traverse --> after more rappels on the left there is a boulder with fixed rope and rappel C15 through a crevice --> a nice jump follows resp. rappel of about 10m in very deep pools --> after the swimming passage it gets narrower --> rappel left approx. 16m --> narrow pool in very clear water up to the place where you can jump, rappel or slide (deep pool) --> the next place is very narrow therefore jumping only for experienced --> in the further course the rappel places 40m are lined up which are differently high and partly have sharp edges --> the view on next pools and the valley are beautiful (the afternoon sun is most ideal) --> the last rappel can be bypassed on the right, however the lowest pool on approx. 350Hm still invites you to swim.		
Retour: (traduction alternative) At the pool before the bridge (ca. 360Hm) right up the stone steps and left through the wooden gate to the road and to the first or second parking lot.

Everything top However, we did not get in from the linked start of opencanyon But followed the markings after the first house... Coordinates: 2'696'264,25, 1'125'671,12 (traduction alternative)

Entry according to the Nizzola guide a little further down than described here. Mostly jumped as far as possible, all pools deep enough. (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Giumaglio Les longues cascades passent avec une corde de 80m. Des jolis sauts et un bel encaissement par moment. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2668/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Giumaglio L'amarage de la mc du premier rappel à souffert, maillon cabossé applatis !! plaquette tordue mais ok.Le reste de l'équipement à tenu bon et est de qualité.Marche d'approche raccourcie en prenant le petit sentier juste après la maison en pierre et qui rejoint directement la première cascade.Très bel enchainement avec d'énorme vasques. Débit extra. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2668/observations.html>)

Everything was fine. Nice short tour. We took the intermediate ascent, as recommended in various guides, and the second rappel and the one after the swimming section are good for jumping. Coordinates of the intermediate entrance: 46.27576755°N 08.68758300°E (traduction alternative)

Automatisch importiert von Schlucht.ch für Canyon Valle di Giumaglio, Wasserstand: "niedrig" Verankerungen: "noch OK, aber eine Sanierung wäre kein Luxus!" Einige Haken durch die Hochwässer der letzten Jahre schon ordentlich in Mitleidenschaft gezogen. (Quelle: <https://schlucht.ch/schluchten-der-schweiz-liste/1014-valle-di-giumaglio>)

Very beautiful canyon. Good water level. Two old defective fixed ropes removed, new ones would have to be put in. Otherwise top. (traduction alternative)
