Avertissements: <i>General prohibition of access (Triglav National Park) (annuellement 01.01. - 31.12.)</i> With a few exceptions, there is a general ban on canyoning in the Triglav National Park. https://win.aic-canyoning.it/forum/topic.asp?TOPIC_ID=2132&whichpage=2		
Spécialités:		
Matériel:		
Résumé: (traduction alternative) Short but huge canyon with a lot of water. A walk is recommended only at low water! During our walk we had 1.81m ³ /s		
Hydrologie:		
Accès: (traduction alternative) Over the Predil pass on the Slovenian side down towards Bovec. \n5,5km after Log Pod Mangartom you reach Fort Kluze. \nYou can park comfortably in front of the bridge.		
Approche: (traduction alternative) The access is on the orographic right side of the river, at the cavern. An inconspicuous path leads there steeply down into the canyon. Last old, desolate wire rope protections.\n\nMan can also walk the gorge from the top: On the hiking trail in the direction of Fort Hermann through the tunnel and at the fork soon after to the right. At the next signpost, turn right onto a somewhat overgrown path that leads directly to the beginning of the gorge (there used to be a bridge here).		
Tour: (traduction alternative) Strong current and turbulent pools alternate in this deeply cut, overwhelming canyon. You should already have some whitewater experience and be able to read the current correctly. \nThe basin before the entanglement holds potential danger. It is better not to rappel down the 6m waterfall at the canyon exit.\nMuch safer is a long, controlled jump.		
Retour: (traduction alternative) At the exit of the gorge, on the orographic right, a path leads back up to Fort Kluze.

Not many vertical meters, but the side walls have the vertical meters. Impressive crevasse! (traduction alternative)
