A week later walked again and lo and behold, the water level has almost halved. Thus no backflows and everything relaxed. It can happen that quickly. (traduction alternative)

So for Aquaticfans a great, but also very dangerous canyon or gorge hike. The returns must be accurately assessed or bypassed. We bypassed one spot (just before the end), because a wild current was already visible before the bridge. It is all jumpable. I jumped the last S18 as well. Who does not want that, is oro right at the top a perfect stand. (traduction alternative)
