Résumé: (traduction alternative) Rappel canyon with partly somewhat gloomy ambience.		
Hydrologie: Da einige Abseilstrecken voll durch die Wasserlinie führen ist ein genaues Begutachten des Wasserstandes vor der Tour unerlässlich! Wasserstandskontrolle: Fährt man in Gudo von der Hauptstraße Bellinzona-Locarno rechts ab beim Ristorante "Cottini" und weiter in Richtung "Cantina Ramelli", überquert man unseren Bach. Die unterhalb der Brücke gelegene Stufe darf maximal 5 cm hoch überflutet sein.		
Accès: (traduction alternative) From Bellinzona, take the road along the right bank of the Ticino in the direction of Tenero and Locarno. Pass through the village of Sementina and about 3 km after Sementina turn right off the main road into the village of Gudo. 300 m after the turn-off from the main road, after the church, go up to the right, immediately turn left again and go straight on for 600 m. You reach a 180° right turn. You reach a 180° rightward haipin bend, after which there is a good parking place on the right.		
Approche: (traduction alternative) 30 m further up the road you will find a signpost "Monts del Laghetto" on the left. Follow this path uphill for about half an hour until you reach a fork with signposts. Turn left here and 100 m further on you will find the entry by a bridge.		
Tour: (traduction alternative) Scenic, the tour surprises by the many palm trees that grow in the middle of the canyon. This is probably why Luca Nizzola named the canyon Ri delle Palme. Since some rappelling routes lead right through the water line, it is essential to check the water level before the tour! Water level check: If you leave the main road Bellinzona-Locarno in Gudo and turn right at the Ristorante "Cottini" and continue in the direction of "Cantina Ramelli", you will cross our stream. The steps below the bridge must not be flooded more than 5 cm. The terrain in the stream is very slippery!		
Retour: (traduction alternative) After the last slide with a fixed rope on the left (better rappel from the tree on the right!) and the clear end of the canyon, a metal staircase leads out of the creek on the left and a path up to a red-yellow painted building. Here through the passage to the right and down to the road (private property!-if you want to avoid trouble, so get out further down the creek!). On the road to the left in a few meters to the car. After half of the tour there is an exit possibility to the left to the ascent path on a path that crosses the stream.

Very nice canyon, especially because of the jungle-like vegetation. Definitely worthwhile. (traduction alternative)

rewarding, beautiful, easy to grip. Anchorages: present everywhere and stable. Description: we needed a total of 2.5 hours for the sup and the inf and we did it comfortably. So the times in the description are rather too high. And it was not slippery, as it says in the description, but grippy. (traduction alternative)

All anchors are present, but some are deformed by debris. But everyone held on. We skipped a few slides due to temptation under water. At the third-to-last rappel, it is definitely worth taking the intermediate belay due to the sharp edge. This is located orthographically to the right around the corner, after the narrowing with the watercourse. Overall, however, a very beautiful and rewarding tour. (traduction alternative)
