Résumé: (traduction alternative) Long rappel canyon with lots of rappels, mountain lift access and east-facing orientation		
Hydrologie:		
Accès: (traduction alternative) We leave the A12 (Sargans-Chur) via the Bad Ragaz exit, drive through the center of Ragaz up to Pfäfers and into the Val Tamina. Passing the reservoir we turn right before the village of Vättis to the valley station of the Vättnerberg cable car. Here we park our car.		
Approche: (traduction alternative) With the mountain railroad we now go up. The cable car is in operation from 15 May to 15 October from 07:30. Tel. contact +41(0)794483851.\nOn arrival at the top (1585m altitude) we take the Wen to the houses of Grasplon (1630m altitude) and further to the hamlet of Hütten (1780m altitude). At 1860m altitude the trail forks and we keep left down to the stream (entry).		
Tour: (traduction alternative) In the open streambed it goes down to a height of 1650m; then the canyoning-like downclimb with rappel, slide and downclimb begins.\nAbout 65 rappel await us, no rappel higher than 30m. Only in the upper area 2 emergency exits are opened. It is not always possible to avoid rappelling in the beam. Towards the exit of the tour you will find more often alternative possibilities (next to or in the beam). Before a bridge we exit to the right onto a path.		
Retour: (traduction alternative) Down the path to the bottom station of the mountain railroad.

It is advisable to reserve a cable car place by phone the day before; then everything works out very well: Loud single hooks but in good condition ,...more water than expected but well machbat (traduction alternative)
