Difficulté: moins difficile	Niveau: v3 a3 III	Temps total: 3h17
Temps approche: 37min	Temps tour: 2h15	Temps de retour: 25min
Altitude d'entrée: 450m	Altitude de sortie: 280m	Altitude du delta: 170m
Longueur du canyon: 1200m	Rapelle le plus haut: 25m	Nombre de rappelles: 12
Transport: à pied	Type de roche: limestone	Zone de prise d'eau: km ²
Saison:	Orientation: Sud-Est	Meilleur moment:
Évaluation: ★ 3.3 (7)	Info: ★ 2.3 (4)	Belay: ★ 2.8 (5)
Spécialités:		
Matériel: Cordes: 2x30m		
Résumé: (traduction alternative) Varied lime canyon; several slides/possible jumps; exposure south/east; approx. 30m grotto with beautiful sintering (lamp not absolutely necessary); water at times somewhat turbid due to vegetation; nice 12m slide; several slippery spots; protection good (10mm Inox); several possible jumps.		
Hydrologie:		
Accès: (traduction alternative) From Domaso head south until you reach the town of Leno. In Leno, take the first road on the right up Via S. Pellico (signposted "Santario dell Soccorso"). Immediately after the fork, keep left and follow the road uphill. At a crossroads keep right and continue uphill until you reach the church "Acquafredda" with a large parking area. Alternatively, choose the parking area at the exit to avoid having to walk back to the higher parking area in neoprene.		
Approche: (traduction alternative) From the parking lot near the church, first follow the paved mountain road "Via S. Benedetto" steeply uphill. After about 20min. there is a fork with a yellow arrow on the left. Here you leave the mountain road and follow the path/trail marked yellow on trees and rocks to the left above the canyon. After about 15min. the path leads to an abseil point attached to the tree into the stream.		
Tour: (traduction alternative) The Perlana inferiore is a discontinuous lime canyon rich in vegetation and mostly open, with several short rappels or possible jumps and slides. Between the steps, especially in the upper part, there are always shorter walking and downclimbing steps (some with small creeks). A beautiful 12m slide in deep pools and a small dark grotto with sintering in the middle of the canyon are the highlights of Perlana. Unfortunately, the grotto was completely clogged at the top at the actual rappelling point into the grotto during our ascent. However, a visit from below was possible. The canyon is also used commercially and is very popular due to the south/east orientation and several jumps and slides. There are several escape/entry points in the canyon. Normally, you get off to the right before the bridge, because after the bridge there are three rather uninteresting rappelling points (16m, 14m, 18m).		
Retour: (traduction alternative) Get off before the bridge on the right side (left private). Then follow back over the bridge and left up the road to the church/parking lot (steep shortcut over cobblestones possible).

We had a training day here focused on efficiency. The canyon can be approached in several ways. We followed the route on the left bank. We followed the path on the map up to the gorge. This path is quite exposed in some places. At the end of the path, there was a rope around a tree with a maillon. We descended from there and ended up in the canyon. We completed the entire canyon, including the last three waterfalls, in just under an hour and a half.

The cave has been open again since this year. This has enhanced the tour considerably. There is still some wood in the cave, but this can be easily bypassed to the left. (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Perlana Gros débit - Les pluies de la veille ont levé le niveau d'eau du canyon mais cela ne pose aucun problème sur les obstacles. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2999/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Perlana We hebben de boom kunnen verleggen in de mooie tobogan. Hierdoor is deze terug te doen. ook het grotje is terug open en geeft de canyon zo terug een mooi uitstraling. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2999/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Perlana Both the beautiful 12m toboggan and the toboggan/jump right after it have a tree trunk stuck at the end of them and are for this reason to be rappelled. The entrance to the cave is open again but the anchors to get in have been either torn away or are just covered by the remains of the landslide that used to block it. We have put in place an emergency anchor with a rock piton just above the rappel to enter the cave. Even though by looking at it from outside it seems to have loads of wood stuck in the narrow part the cave is actually practicable (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2999/observations.html>)

2023-08-05 | Christoph Cramer | ★★☆☆ | 📖 ★★ | 📍 ★★ | 🌊 Normale | 🟢 Terminé

The highlight of the cave passage and jump in's dark hole is currently not possible due to massive blocking at the rear cave entrance. Bottom line too little beautiful for the long verblockte route, the approach and the Verbauung in the lower part, description updated with parking. (traduction alternative)

2023-08-05 | Bastien P. | ★★☆☆ | 📖 ★★ | 📍 ★★ | 🌊 Normale | 🟢 Terminé

Stands all in order. Canyon which unfortunately lacks something that it becomes something special. (traduction alternative)

2023-06-09 | Michael Rosenhammer | ★★☆☆ | 📖 | 📍 | 🌊 | 🟢 Terminé

Stands are Ok, approach at the yellow arrow (slightly faded marked on the ground), yellow dots mark the trail that leads to the entrance (slippery after rain). Slide was doable, worthwhile tour. (traduction alternative)

2023-06-04 | Wolfgang | 📖 | 📍 | 🟢 Terminé

Due to rain in the north a little further to the south. Approach because of rain before extremely slippery (no longer fun). All stands so far ok (traduction alternative)
