Spécialités:		
Matériel: Cordes: 2x50m/1x20m		
Résumé: (traduction alternative) Short, but versatile canyon with a piece of dark gorge, washed out rock, some possible jumps and easy switchbacks. Highly recommended beautiful lime canyon; rappel mostly in the watercourse; exposed belays; rappel points not always visible; clean water; beautifully polished limestone; 2 variants possible; be sure to check the water level at the last rappel point before the tour; from noon you have the most light in the canyon.		
Hydrologie:		
Accès: (traduction alternative) Coming from Carnia, take the SS13 in the direction of Tarvisio. About 1,5 km after the Hotel Carnia, at a left turn (km 172) and after the brown sign "Moggio Udinese" you will find on the right side a parking possibility at the exit of the canyon. . You can shorten the access by taking a second car to Stavoli Ravorade. With the second car you go back towards Carnia (Udine). After the traffic junction at Carnia, cross a bridge with tracks underneath. Shortly after, you should turn left towards Tugliezzo, but this is not possible because of the barrier line, so you have to turn right towards Carnia. At the exit turn right and follow this road stopping on the left (goes under the SS13 road) at the crossroads go straight on towards Tugliezzo. An asphalted road winds up next to the huge gravel field towards the few houses of Tugliezzo. After the houses on the plateau, the road descends with a sharp bend to the right, passing a barrier and the bridge that crosses the Rio Lavarie. For the Rio Lavarie it is best to park the car after the bridge at the left gravel place. If you want to go the right tributary (Rio Barbar) of the Lavarie so you look a little further up just before another bridge, where there is a large boulder field (strong left bend), a parking possibility.		
Approche: (traduction alternative) At the barrier on the left side of the road begins the sloping path that you follow to the streambed (old bridge wall)--> entry at about 450Hm.		

Tour: (traduction alternative)

Arrived at the streambed, after a short walking passages you come to the first step that can be downclimbed on the left. After that, in a narrowing canyon, comes the 1st short rappel point followed by a not visible about 35m high rappel point which is best reached via a removable traversese rope left. After this rappel point, the mostly incised part of the canyon begins. Small twists, steps and a 5m rappel occur in this part. At the end of the 100m narrow section, the canyon opens again briefly. You come to a 5m step that can be rappelled or slid. Here you also meet the right tributary Rio Barbar. Continue with rappel in the water stream, first 15m left, then about 10m right. After that you have several possibilities to rappel. In case of strong water flow you should stretch a traversese rope across the chute to the hidden piton on the left side, then rappel outside the water flow for about 30m to the lower chain anchor on the right. From the chain anchor it goes without visual contact, either 25m to the right intermediate belaystation or a good 40m to a belaystation on the left with a traversese rope (! the traversese rope together with the bolthook is often destroyed by the water). The final rappel on the left has about 30m or on the right from the intermediate belaystation about 40m. After the final waterfall you walk a short distance along the streambed to a large rock step which you climb down on the right. After the 1st bridge the tour ends at about 270Hm.

Retour: (traduction alternative)

Before the 2nd bridge you climb right out of the streambed. In a short time you will reach the parking lot.

Rapports:

2024-10-26 | Anouk | ★★★★★ | 📖 | 📍 | 🌊 Haut | ❤️ Pas fait

Nice anchors in the canyon. More water than normal what can make the canyon more sporty. Well to do with our team. Beautiful small canyon. (traduction alternative)

2024-10-25 | Péter Bonczi | 📖 | 📍 | 🌊 Haut | ❤️ Pas fait

Today's water level. (traduction alternative)

2024-10-06 | Horst Lambauer | ★★★★★ | 📖 ★★★★★ | 📍 ★★★★★ | 🌊 Fou | 👍 Terminé

We also climbed the upper part and renovated a few anchors there. We know the canyon very well, so we went in at the water level. However, it is only recommended for people with some experience in the water. (traduction alternative)

2024-09-22 | Horst Lambauer | ★★★★★ | 📖 ★★★★★ | 📍 ★★★★★ | 🌊 Faible | 👍 Terminé

If you didn't go over to the chain on the SOS8, but went straight down through the water from the 2 glued anchors (approx. 20m), it's much more advisable. You come to a pool and there you rappel another 10m. We renewed this 10m rappel with a ring because the other anchor was already loose. Everything else is superiore set up (traduction alternative)

2024-09-08 | Horst Lambauer | ★★★★★ | 📖 ★★★★★ | 📍 ★★★★★ | 🌊 Faible | 👍 Terminé

Everything tip top, little water (traduction alternative)

2024-08-29 | Florian Heufler | ★★★★★ | 📖 ★★★★★ | 📍 ★★★★★ | 🌊 Normale | 👍 Terminé

All stands ok, jumps and slides all doable (traduction alternative)

2024-08-23 | System User | 📖 | 📍 | 🌊 Normale | 👍 Terminé

2024-08-17 | Georg Rudelstorfer | ★★★★★ | 📖 ★★★★★ | 📍 ★★★★★ | 🌊 Faible | 👍 Terminé

Top equipped and beautiful as always. Unfortunately, I probably tore my sheath on the SOS8 rappel. The rope probably slipped into the crevice. (traduction alternative)

2024-08-16 | Wolfgang | ★★★★★ | 📖 | 📍 ★★★★★ | 🌊 Normale | 👍 Terminé

Night tour with local friends. Something completely different but very nice if you know the tour The tour has recently been redrilled by locals. Especially the last part can be done completely in the water course if you want. I liked it and I hope to be able to see it in daylight soon (traduction alternative)

2024-08-11 | Marosffy Dániel | ★★★★★ | 📖 ★★★★★ | 📍 ★★★★★ | 🌊 Faible | 👍 Terminé

Everything went as expected, the slide and the following two jumps were clear. Busy as usually.
