<b>Matériel:</b> Cordes: 2x 50m		
<b>Résumé:</b> (traduction alternative) Rappel canyon under a reservoir		
<b>Hydrologie:</b>		
<b>Accès:</b> (traduction alternative) From Bellinzona or from the Gotthard Pass to Biasca. From there, take the road to the right of the highway in the direction of Gotthard until Bodio. In Bodio turn left to Personico. Cross under the freeway, then on the village street through Personico, driving again in direction Biasca out of the village, after approx. 300 m passing a grotto on the right. Shortly after a workshop on the left, the road crosses the stream. Park a car there. With the second car back to Personico and in the village after a distinctive 90° right bend with a left bend immediately following between these two bends, turn backwards at an acute angle up to the left. Follow this road up to the reservoir.		
<b>Approche:</b> (traduction alternative) In the middle of the dam, on the downstream side, you can see a tiny cottage. To the left of it there is a door in the wire fence. Here first on some steps down towards an old dilapidated stone bridge. To the left of it on the brick dam foundation to the exit of the foundation, then descend to the right over boulders to the deepest point. From here rope in.		
<b>Tour:</b> (traduction alternative) Relatively short canyon with beautiful rappels. Problematic is that even in the event of a malfunction of the power plant, the not exactly little water from the upper Rierna is directed past the small reservoir into the canyon and that too automatically. This means a deadly and incalculable danger.		
<b>Retour:</b> (traduction alternative) After the last waterfall, swim across the pool and climb along the left rock wall. Return to the car along the path.
