Spécialités:		
Matériel: Cordes: 2x20m		
Résumé: (traduction alternative) Sequence of many smaller rappels in a continuously narrow and long gorge section		
Hydrologie:		
Accès: (traduction alternative) Coming from Innsbruck, we leave the A 12 at Zirl onto the B 177 in the direction of Seefeld, Garmisch (D). After about 2 km we leave the B 177 via the Zirl-West exit. This is where the Hochzirler Straße begins, which we follow uphill. After 1.7 km, a forest road joins from the right. Here we can park the lower car in a suitable place. The second car continues uphill, past the Hochzirl train station to the Hochzirl regional hospital (3 km from the B 177). Park the (upper) car on the left-hand side of the road here.		
Approche: (traduction alternative) From the upper parking lot, we take the forest path that leads directly above the hospital in an easterly direction. Follow the signs to the "Solsteinhaus" here and beyond. If you only have one car available, it is best to park it in the lower parking lot and then walk up the forest path that ends here. After just 300 m, you have the first opportunity to change to the upper access path ("Brunnalm"). After 2 km (from Hochzirler Straße) there is a second option (easy forest path) and after about 3 km a third option (just before crossing the Ehnbach). Follow the signs to the "Solsteinhaus". At an altitude of 1385 m above sea level, we pass the freight elevator to the Solsteinhaus. We continue uphill on a path past a fountain with fresh water. At 1610 m above sea level, we pass a hunting lodge (on the left) and shortly afterwards come to the Soln-Alm (1645 m above sea level - also with a fountain). To the right of the path we now see a fenced-in wooden cross. Directly to the left of this, a path leads down to the stream.		
Tour: (traduction alternative) After about 100m in the open gravel bed of the Ehnbach stream, the gorge begins. Now follows a long series (about 30) of shorter rappels (mostly outside the beam) until you reach the exit of the first section of the gorge after about 2 hours. Here, if necessary, you can climb steeply up to the slope. The more recommendable variant leads after another hour and 5 not unattractive rappels as well as a longer stretch in the stream bed gravel down to the exit on the crossing piste.		
Retour: (traduction alternative) On the slope always slightly downhill and via the hiking trail past the train station to Hochzirler Straße.

Access by MTB (45min) and hiking 1:15h Beautiful canyon, well worth the walk. Well set up, beautiful rock, lots of boulders in the canyon. Superiore day! (traduction alternative)

2024-08-23 | Max Rudholzer | ★★☆☆ | 📖★★★★ | ⚓★ | 🌊 Faible | 👍 Terminé

Scenic, fascinating and extremely rewarding. There is a bolt at belay 23, but there is no bolt and rapid link. However, the spot can be downclimbed without any problems at this water level. An obstruction must have come loose at belay 18. Here the anchor can only be reached via a robber's ladder. Be careful at the blockage at the Gnaupenloch. It is easy to trigger a rockfall here. (traduction alternative)

2024-08-10 | Gregor Bernsteiner | ★★☆☆ | 📖★★★★ | ⚓★ | 🌊 Normale | 👍 Terminé

Very beautiful canyon. Lots of gravel and debris in the canyon. At the Gnaupenloch unstable blockage, can be avoided with rope traverses. Stands in order (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Gnaupenloch Ankrages ok. Très beau canyon alpin. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23104/observations.html>)

2023-10-15 | System User | 📖 | ⚓ | 🌊 Normale | 👍 Terminé

Automatisch importiert von Descente-Canyon.com für Canyon Gnaupenloch All anchors ok, all quicklinks in place, single most of the time, best not to add more anchors, as the river bed will again change in time, just be prepared with a bolting kit and know when a storm has hit (this was the case in 2023, hence the new anchors). (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23104/observations.html>)

2023-10-15 | Jeroen Kirchner | ★★☆☆ | 📖★★★★ | ⚓★★★ | 🌊 Normale | 👍 Terminé

All anchors ok, quicklinks in place, single most of the time, best not to add more since the river bed will change in time but bring a bolting kit just in case and know when a storm has hit (this was the case in 2023). Great with mountainbike. (traduction alternative)

2023-09-28 | Clarissa Linder | ★★☆☆ | 📖 | ⚓★★ | 🌊 Faible | 👍 Terminé

2 new hooks set (No. 31 and No. 20). A lot of gravel and debris since the last flood. When abseiling in the "Gnaupenloch" has also come with the unstable entanglement some stones. (traduction alternative)

2023-07-10 | Patrick Summerer | ★★☆☆ | 📖★★★★ | ⚓★★★★ | 🌊 Normale | 👍 Terminé

At the rappelling point with rope railing directly at the "Gnaupenloch" (stone arch at the end of the narrow cut section) is a somewhat unstable entanglement, The rapid link for rappelling was moved to the second anchorage at the rope railing. (traduction alternative)
