<b>Résumé:</b> (traduction alternative) Elongated rappel canyon.		
<b>Hydrologie:</b>		
<b>Accès:</b> (traduction alternative) as for Marderello inferiore or Claretto inferiore/superiore: coming from Turin, Frejus, we leave the A32 at the exit "Susa Est", cross the town of Susa and then take the SP210 to Novalesa. Once there, without crossing the Rio Claretto, we take "Via Roma" in a southeasterly direction to Sant'Anna. Soon after the last houses of Novalesa we come to the bridge over the Rio Marderello. Just before the bridge we park our car on the left.\n\nIf we are coming from the direction of Briancon, we leave the A32 at the exit "Susa Ovest" and get directly onto the SP210, which leads us to Novalesa (see aerial photos for the approach).		
<b>Approche:</b> (traduction alternative) first as at Marderello inferiore: we take the path that leads from the car towards the clearly visible final waterfall of the Claretto. We come to the stream, cross it and climb steeply on a path on the orographic right bank. We come across a forest path, follow it and then we see on the right, a little below, the small diversion channel (possibility of emergency exit if necessary) and we come to an alpine hut ("La mojùn de paréin Steu"). We now take the path on the right down into the canyon (signpost "Tordupi") and quickly reach the bridge over the Rio Claretto. After the bridge, turn right and go slightly downhill to a small hut. Continuing on the path in a southeasterly direction, we come to the entry point to the lower part via via ferrata.\n\nWe now continue here on the path on the orographic. right slope above the Marderello uphill. We pass a house.\n\nAt about 1360m altitude, the possibility opens to cross into the stream (entry altitude about 1340m). This entry is here below an approx. 25m high rappel.\n\nBut there is also the possibility to climb further up, to enter at about 1460m (then 4 more rappels are added in the descent (15m-15m-40m-25m). We climb here into a fairly open streambed with quite a mess of rocks.\n		
<b>Tour:</b> (traduction alternative) Depending on the height of the ascent, about 11 or 15 rappels to the beginning of the lower part in a canyon that becomes visibly narrower and deeper.		
<b>Retour:</b> (traduction alternative) Either exit to the right after the C54 or after the two following rappels (10m+15m) via ferrata and then return to the valley on the approach path; or continue descending in the canyon via the lower part (see description Marderello inf.).

Automatisch importiert von Descente-Canyon.com für Canyon Marderello (amont) Canyon pour initié qui nécessite bien maîtriser des techniques de TA. Fait la partie amont en integral avec l'aval. L'amont ne represente pas d'interet, surcote, beaucoup de marche en bloc. On a relie les points de la c27. On a ajoute une cordelette sur bloc de la C4 finale car on a pas de trouve de relais. L'ensemble des relais est correct. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23041/observations.html>)
