<b>Spécialités:</b>		
<b>Matériel:</b> Cordes: 2x30m Lampe frontale,		
<b>Résumé:</b> (traduction alternative) Rappelling through a water bearing cave		
<b>Hydrologie:</b> <a href="http://www.saihebro.com/saihebro/index.php?url=/datos/ficha/estacion:A321">http://www.saihebro.com/saihebro/index.php?url=/datos/ficha/estacion:A321</a>		
<b>Accès:</b> (traduction alternative) Leave the N-I freeway (Gasteiz/Vitoria - Pamplona) at exit 389 to Eguino (Eguino), to the north. Do not enter the town, but when you reach the houses, take the A-3012 road, which goes to the left (westward) in the direction of Ilarduia. About 700m after Eguino and about 100m before reaching Ilarduia, a sign 'Leze' points to the right and after about 400m we reach a sparse deciduous forest with parking and picnic areas. Here we park the car.		
<b>Approche:</b> (traduction alternative) From the car (about 630 m a.s.l.) we head for a chute in the rock face west of the large, elongated cave opening. For a short time we go up along the edge of the chute over a wire-rope secured rocky ridge, then the trail crosses an old water pipe and we reach the ridge above the rock face. We now follow the path for about 15 min. towards the prominent gulch on the ridge above us (Brecha Koloska). Before it gets really steep, we take a path at an altitude of about 750 m to 800 m above sea level (partly only indistinct traces of the path), which leads us up to the right in the direction of ONO to the ridge at about 1000 m above sea level. We cross the ridge to the north (not to the northeast !), descend steeply and then go down pathless to the northwest in the hollow beyond the ridge. We eventually come to a ledge where we can look through trees to the northern cave opening. We reach the cave entrance either by rappelling in the left chute or by sliding/rappelling in the steep cirque to the right of the cave entrance (access time about 1.5 hrs.). In the internet findings, a path is described several times, which at the beginning is more eastward oriented and seems to be more pronounced. Gomez goes right (or left) only shortly before the Brecha Koloska. There is also an extreme access through the Brecha de la Koloska: <a href="http://www.barranquismo.net/paginas/barrancos1/acceso_a_la_leze.pdf">http://www.barranquismo.net/paginas/barrancos1/acceso_a_la_leze.pdf</a> The access is facilitated with the ability to orient.		
<b>Tour:</b> (traduction alternative) 12 rappel in the dark. The cave stretches across the ridge in the form of the entrance and exit opening. intense impressions regarding the sounds and the (indirect) incidence of light. The water flow is basically moderate. Do not enter during threatening. Thunderstorm enter.		

**Retour:** (traduction alternative)

At the cave exit left or right out to the picnic sites and the car.
