Résumé: (traduction alternative) VERY aquatic canyon with fun potential.		
Hydrologie:		
Accès: (traduction alternative) From Lavorgo in the direction of Chironico, turn off into the "Valle dei Chironico" in the direction of "Rive". Park the car at the exit of the road.		
Approche: (traduction alternative) From the car directly to the stream in just a few minutes.		
Tour: (traduction alternative) Short tour with an extremely large amount of water and a "catapult slide" with a considerable kicker. Despite the short length of the tour, great caution is required due to the large amount of water. The canyon is just half a meter wide at its narrowest point in this part.		
Retour: (traduction alternative) Orographically left out of the stream after approx. 300m left up to the road, on the road back to the car.

2024-08-08 Noah Vestering ★★★★★ 📖 ★ 🪚 ★ 🌊 Normale 🍌 Terminé Walked into the canyon from the waterfall you can see from the parking lot. On the 1st and 2nd descent we were able to find the anchor points well. At the 3rd we could not find an anchor point, we did find prussik and a maillon around a tree, we replaced the prussik for a bandsling (red black). At the 4th abseil a good search, it is hidden above the abseil in the river from the current (a kind of pointed rock in the middle) at the 5th /6th abseil there is halfway (above the big stone) another relay for the 6th abseil. We went over the stone (When pulling back the rope be careful not to pinch it). (traduction alternative)
