Résumé: (traduction alternative) Open canyon with beautiful views of the Achensee.		
Hydrologie:		
Accès: (traduction alternative) On the B181 to the Achensee, either coming from the Inntal or from the Sylvensteinsee or Kreuth. About halfway along the lake shore you come to the entrance of the campsite "Schwarzenau". Here you can park your car east of the B181 near the bridge over the Schwarzenaugraben.		
Approche: (traduction alternative) On the B181 northward over the bridge. Immediately after the bridge (970m a.s.l.) we take the hiking trail eastwards up to the Kotalm-Niederleger (1260m a.s.l.). There we take the southbound track and follow it until the first sharp leftward hairpin bend (1300m a.s.l.). Here trailless some meters steeply uphill (to about 1330m a.s.l.), then right first above along the break-off edge towards south and streambed, finally (as soon as possible) down into the streambed.		
Tour: (traduction alternative) A few meters in the slightly sloping stream, then the first high rappel awaits (stand left) now one rappel follows the next, in between shorter walking passages and downclimb passages. There are no slides or jumps.		
Retour: (traduction alternative) Exit to the left onto a faint track that quickly takes us to the bridge and the car.

Automatisch importiert von Descente-Canyon.com für Canyon Schwarzenaugraben Après les chutes de pluie et de neige de la semaine dernière, on constate une forte augmentation du débit. Une belle descente. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22390/observations.html>)

With the current amount of water (snowmelt in September) a great tour. The key point is the waterfall with the intermediate basin, where you can hardly avoid the falling water. (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Schwarzenaugraben Nous avons fait la descente sous une légère bruine. La quantité d'eau était correcte et nous avons aménagé deux nouveaux relais: Sur la double cascade, une à gauche au milieu (donc maintenant 10, 20, 15 m de hauteur de rappel) et sur la cascade la plus haute, un tout devant sur le bord (40 m de hauteur de rappel). Le retrait de la corde se fait désormais sans problème (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22390/observations.html>)

Hiked in relatively poor weather. The canyon loses a significant part of its charm in poor visibility - we could only guess at the beautiful view instead of enjoying it. The condition of the anchoring is mixed. Partly very good, partly poor (e.g. loose chain links, rusty chain links) The ascent in just under an hour as described is ambitious. The ascent is steep. All anchors in place, even after a heavy thunderstorm. At the exit of July, the sun shines in perfectly in the afternoon, on hot days also possible without a neoprene top (traduction alternative)

Top anchor, good water level, very slippery in places. (traduction alternative)
