Matériel: Cordes: 2x 40m		
Résumé: (traduction alternative) Technically challenging, beautiful aquatic canyon with crystal clear water and deep pools; many possible jumps; several rope traverses allow to bypass dangerous places, but problematic at high water levels.		
Hydrologie:		
Accès: (traduction alternative) From Biasca drive in the direction of Bellinzona. At the main road near Iragna turn right and park at the large parking lot at the beginning of the village (sports field).		
Approche: (traduction alternative) From the parking lot walk in the direction of the village center/bridge. Then left along the stream --> after the barrier you can see the last rappel (water level control) --> on the left side it goes past the material ropeway --> hiking trail up past the back of the houses --> hiking trail goes over small stone bridge --> signpost --> small house --> stone steps with railing --> iron gate --> chapel --> follow hiking trail until you leave approx. 510Hm --> left narrow trail down to the stream.		
Tour: (traduction alternative) Wild and attractive canyon for experienced canyoneers. Walk with as little water as possible. At the abseil point in the chute, which is about 15 m long and the end of which cannot be seen, be sure to traverse along the edge to the right to the intermediate level not yet visible from the first abseil point! In general, the ascent of the lower part is connected.		
Retour: (traduction alternative) Either before the last part turn left out onto the path and down along it, or later out onto the stone bridge if you don't want to go all the way to the exit of the second part.

Not sure the canyon is "technically demanding" compared to others. Perhaps at higher flows actively belaying is necessary to avoid being washed over the next waterfall. The infinity pools and slippery wet granite would prove very difficult in high flows for sure. At the level I went down at, it was easy. Slides and jumps. A fixed line abseil or two. Super super good. Packed full of guests on the weekends! Picture for flow reference. It hasn't rained here in a while, so perhaps this is actually a low flow, not normal?

Automatisch importiert von Descente-Canyon.com für Canyon Iragna (superieur II) Descente à partir de l'intermédiaire. Risque de coincement de corde en bas de la cascade C24 dans la faille (la corde peut être aspirée entre les blocs au pied de la gerbe). Rien d'autre à signaler.
