Évaluation: ★ 3.1 (2)	Info: ★ 0 ()	Belay: ★ 0 ()
Avertissements: <i>Trockene Gumpen: Kesselfalle (Marmita Trampa)</i> Gumpen, der entweder kein Wasser hat oder der Wasserspiegel nicht bis zum Rand des Gumpens reicht. Damit kann ein Herausklettern evtl. nicht möglich oder zumindest schwierig sein.		
Spécialités:		
Matériel: Cordes: 2x70m		
Résumé: (traduction alternative) Rappel canyon with "run up"		
Hydrologie: Marmita Trampa !		
Accès: (traduction alternative) On the GC_1 from Maspalomas to Arguineguin. After leaving the GC_1 there and driving towards the center of Arguineguin, change at the next exit to the east side of the valley and drive on the GC_505 in the valley of the Barranco Arguineguin northward and up to Soria (670 m a.s.l.).Through Soria and on the tarred little road further about 1.5 km slightly downhill until the road crosses the streambed of the Bco. Above the road the basin with the second high rappel. Here you can leave your car and shuttle to the other side. Either over a slope (for normal cars just still drivable), which leads in extension of our access road up to the GC_605, or back over Soria and up to the Embalse de Cueva de las Niñas, along its northwest slope, until one reaches the road junction at the exit of the reservoir (970 m a.s.l.), where one can approach the dam wall on the tarred road closed with barrier (cf. Internet finding place 'gpswandern').		
Approche: (traduction alternative) From the car on the tarred road back again and after about 300 m turn right onto the dirt road that joins at a sharp angle. Follow the path uphill for about 20 minutes until you reach the large basin, cross it and look for the trail on the opposite side. After passing the rock walls, the path goes up towards the ridge. It reaches the tarred road (signpost in the opposite direction 'Soria'). On this left in a southerly direction you come in a good 20 min. to the houses at the dam wall (cf. Internet finding place 'gpswandern').before the houses at the dam wall southward down to the Barranco, but not immediately into it, but about 10-20 m above along, later on a water pipe, until you - as late as possible - can descend into the streambed.		

Tour: (traduction alternative)

First "children's canyon", then sequence of several (5) partly high rappel into a large rocky basin. In the upper cauldron you can either orographic. rappel left (70 m to the small pool, then 25 m to the large pool, 12 m after the large pool) or right (estimated 50 m to the intermediate stand on the tape and from there estimated 45 m to the large pool).The lower cauldron has a height of 70 m and can be broken after about 20m, but will be away. the exposing of the intermediate stand not everyone's cup of tea.

Retour: (traduction alternative)

Down to the road and to the right there to the car.
