| Résumé: (traduction alternative) Mostly rappel canyon with little water | | |
| Hydrologie: | | |
| Accès: (traduction alternative) On leaving Ribeira Brava in the direction of Sao Vicente, take the turn-off to the commercial area (Continente supermarket) before the tunnel. Park your car in the public parking lot (please do not park in the supermarket parking lot). The final waterfall can be seen from the parking lot. Take the second car via Campanario in the direction of Sao Paulo. Park in Estr. da Eira do Neto. | | |
| Approche: (traduction alternative) A short, easy hiking trail in the direction of Ribeira Brava leads from Estr. da Eira do Neto down to the canyon. Alternatively, follow the hiking trail uphill from Ribeira Brava in the direction of Estr. da Eira do Neto to the bridge over the Ribeira Funda. The path to the top is steep but well developed. | | |
| Tour: (traduction alternative) Access from the bridge. The canyon is heavily overgrown in places, especially at the beginning. The highlight is the final waterfall, which can be seen from the supermarket parking lot and is rappelled in two stages. Always stay on the ropes until the next anchor! The canyon is not optimally equipped (as of early 2024). Some of the next anchor points cannot be reached if you pull off the rope too early! | | |
| Retour: (traduction alternative) Follow the stream until it flows into the river. Cross the river and take the ladder up to the parking lot of the DIY store. | | |

Since the heavy rains at the exit of October, there has been a lot more garbage in the canyon. It's a shame that the locals are spoiling their beautiful island like this. We did a bit of sawing work in the canyon in the construction area. The anchors are all in place, but a few additional anchors would help to avoid strong rope friction. (traduction alternative)

We drove up for 20 minutes and then descended for another 15 minutes via stairs - so it would have been worth walking up. Unfortunately there was a lot of garbage in the stream and the water quality was rather poor. However, the last three spots made up for everything! (traduction alternative)

Very beautiful canyon with a really spectacular cascade. Unfortunately a lot of garbage in the canyon. New anchors would significantly enhance and simplify the canyon. (traduction alternative)
