Automatisch importiert von Schlucht.ch für Canyon Riale di Mulitt, Wasserstand: "niedrig" Verankerungen: "i.o." Beim zweituntersten Stand(C 22) ist ein Klebhaken ausgerissen und der zweite ist locker. Hatte leider nichts dabei... Good canyon after a day with a lot of rain, we made a few jumps and abseils. The anchor halfway down the high abseil near the bottom has a damaged anchor in the middle. One glue-in bolt has come loose. The other one is loose as well. We also did the last abseil. Stay directly to the left when looking for the path back. Once you find the path, it's super clear.

Everything in order. A bit slippery, but quite a few jumps for a stream with such a small catchment area. (traduction alternative)

Slippery in some places. Cold water. We got off at the exit at Intragna via well-secured ladders. The cable car is probably being completely renovated and is therefore not running. However, you can book a cab in advance or drive up yourself. We walked from Intragna to the entry point in 35 minutes. Water level in the picture: rather low (traduction alternative)
