Matériel: Cordes: 2x30m		
Résumé: (traduction alternative) Sa Spendula is a succession of beautiful waterfalls. Riu Coxinas is the stream that feeds them and as such is not a burner, especially quite overgrown.		
Hydrologie:		
Accès: (traduction alternative) Leave the four-lane SS 131 from Cagliari to Sássari about 40 km north of Cagliari at Sanluri and go through San Gavino Monreale and on to Villacidro. At the overpass of the SS 196, the wide bypass of Villacidro, turn right onto the SS 196 in the direction of Gùspini. After about 2 km, the northern access road to Villacidro branches off to the left. Follow this access road in the direction of Villacidro and, before reaching the village, turn right at a crossroads with a signpost 'Cascata Sa Spendula'. After a wide bend to the left, there is a large parking lot on the right. Here is the exit. With a second vehicle or on foot from the parking lot on the road we came, turn right and up the hill. At the first houses, after a left-right bend, a road branches off to the right and goes steeply uphill. Go up this road and shortly after turn right again onto a narrow tarred road that leads up through pine forest and past a waterworks. Pass the waterworks on the right and at the end take a gravel road to its exit at a parking lot below the facility with the transmission towers (approx. 30 min. ascent).		
Approche: (traduction alternative) From the parking lot on the wide marked path in the direction of the west into the valley. After about 5 minutes of walking you can see a dam wall in the background. You could walk to the dam wall and get in there. If you like to get completely scratched in dense brush, you can do that. But it is recommended to descend to the right to the canyon shortly after the prominent trail cut between the rocks. This way you can enjoy the interesting final section and avoid the weedy upper stream section to a large extent.		
Tour: (traduction alternative) Up to the final waterfalls stream climbing without significant slope and almost without rappel.		
Retour: (traduction alternative) After the last waterfall on the footpath to the car.		
Coordonnées: Départ du Canyon 39.4651 8.7214 Fin du Canyon 39.4679 8.7253

Automatisch importiert von Descente-Canyon.com für Canyon Coxinas Sec malgré au moins 2 jours de pluie. Vasques pas croupies mais presque ! Seule la partie finale est intéressante dans ces conditions. Canyon bien envahi par la végétation. Équipement ok. A faire avec de l'eau ! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22430/observations.html>)
