Pays: Schweiz / Switzerland Région: Kanton Bern / Canton de Berne Sous-région: Verwaltungskreis Frutigen-Niedersimmental / Frutigen-Niedersimmental administrative district Ville: Kiental		
Difficulté: difficile	Niveau: v5 a5 V	Temps total: 5h20
Temps approche: 2h	Temps tour: 2h40	Temps de retour: 40min
Altitude d'entrée: 1950m	Altitude de sortie: 1670m	Altitude du delta: 280m
Longueur du canyon: 1000m	Rapelle le plus haut: 60m	Nombre de rappelles: 20
Transport: à pied	Type de roche: limestone	Zone de prise d'eau: 6.50km ²
Saison: octobre - novembre	Orientation: Nord	Meilleur moment: 10-14 Heures
Évaluation: ★ 4.8 (9)	Info: ★ 1.6 (5)	Belay: ★ 2 (7)
Spécialités: Glacier dans le bassin versant, canyon d'hiver,		
Matériel: Cordes: 2x70m Lampe frontale,		
Résumé: (traduction alternative) High alpine gorge with entry directly under the glacier. One third of the route is in complete darkness.		
Hydrologie:		
Accès: (traduction alternative) A6 to Spiez, then turn off in the direction of Adalboden. In Reichenbach turn left and follow the road uphill to Kiental. Continue to the exit of the public road at the parking lot Griesalp (2016: 2 Chf, exchange machine for francs available)\n		
Approche: (traduction alternative) Follow the road as far as a snack station, from here on a mountain pasture path crossing steep terrain to the flat Gamchiboden. The further ascent crosses rocky terrain and is secured in places with wire ropes. At about 2000m the path climbs to the left to reach the glacier moraine above. Here turn right onto a very indistinct path that crosses the crumbly slope directly to the entry (cairns). If you want to walk the main branch of the gorge you can enter at the first gorge about 90m above the bridge, otherwise still about 100m to the east to reach the left gorge branch. In winter the bridges over the gorge are dismantled. The access crosses many small watercourses that are completely frozen in winter. Crampons and ice axes are then necessary.		
Tour: (traduction alternative) Main branch: First downclimb on the orographic right canyon rim just above the beginning of the gorge, then downclimb and rappel in the narrow gorge where the left branch joins (here three rappels). In open terrain with not easy downclimbs to a break above the gorge. From the rock platform on the left 20m rappel, then from the anchor on the right under a large clamping block. The rappel points for the 60m rappel are on the left. If the water level is too high for a direct rappel, there is a difficult to reach intermediate stand after a few meters on the left. From here several rappels in complete darkness before the gorge ends with a long, narrow corridor.		
Retour: (traduction alternative) Turn right onto the trail and return to the car as for the access.

Automatisch importiert von Schlucht.ch für Canyon Gamchibach / Gletscherschlucht, Wasserstand: "Niedrig"
Verankerungen: "Gut" Es hatte genügend Schnee, Standfindung und Fortbewegung im Wasser nicht einfach. Alles mit Steigeisen gemacht. Super coole Eindrückliche Schlucht. (Quelle: <https://schlucht.ch/schluchten-der-schweiz-liste/1069-gamchibach-gletscherschlucht>)

Automatisch importiert von Descente-Canyon.com für Canyon Gamchi No jumps, no toboggans and a lot of caca-bloc in the collecteur before the dark section. But this section is truly fantastic. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22228/observations.html>)

2024-11-16 | System User | |📖|📍|🌊 Normale |👍 Terminé

Automatisch importiert von Descente-Canyon.com für Canyon Gamchi We recommend crampons. For the approach. These are not necessary in the gorge. At this water level, you can abseil down the high waterfall directly. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22228/observations.html>)

2024-11-16 | Bina |★★★★☆|📖|📍★|🌊 Normale |👍 Terminé

We recommend using crampons or grödel for access. These are not necessary in the canyon. The high waterfall can be rappelled directly at this water level. (traduction alternative)

Automatisch importiert von Descente-Canyon.com für Canyon Gamchi Equipe de sauvetage des cordes, un beau sac de nœud à démêler. Sinon nous sommes allés chercher le fractio, aucun problème pour arriver en bas avec des cordes de 65m. Bonne condition, aucun soucis et canyon mythique ! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22228/observations.html>)

2024-11-10 | System User | |📖|📍|🌊 Haut |👍 Terminé

Automatisch importiert von Descente-Canyon.com für Canyon Gamchi Toujours top! :D conditions parfaites, gros débit selon les critères de la base ;-) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22228/observations.html>)

2024-11-10 | System User | |📖|📍|🌊 Haut |👍 Terminé

Automatisch importiert von Descente-Canyon.com für Canyon Gamchi Le sol est bien gelé (températures négatives toute la journée à l'ombre) mais pas de glace dans le canyon pour le moment. Il est possible que la grande cascade mesure désormais un peu plus (ce sont des alluvions au pied)... Il y avait quand même du rab sur notre 70m (sans le fractionnement). Pour l'équipe qui nous suivait, espérons que quelqu'un passe lundi, avant que la neige fasse son apparition. Le débit reste conséquent. 2 points rajoutés (au début du bras principal + départ MC accès à la grande cascade) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22228/observations.html>)

Superbe canyon, par contre la 56m ne les fait pas du tout, on est plus 65m !!!! Du coup on a laissé nos deux cordes sur place malheureusement... Merci de me contacter au +33648747501 si vous les récupérez, on vous offrira une bonne bouteille ;) Superb canyon, on the other hand the 56m is not at all, we are no longer 65m!!!! So we left our two ropes there unfortunately... Please contact me at +33648747501 if you recover them, we will offer you a good bottle ;)

0°C at 2900 meters, no snow or ice in the canyon. Bridges were removed for winter, so we chose to start at the right section ('bras central'). Anchors are of good quality. Mostly single bolts; high rappels with double bolts. We did the C56 with the D7 and D48. Tricky (but not too hard) to reach the anchor of the D48; and easy to spot from above. With a 50m rappel rope we barely made it to the ground (the last person ended up 2 meters above the ground). We would advise to take a longer rope (55+m). Most bolts are well placed so you can stay clear of the water. Siphons were not a problem, easy to shunt or go through. Beautiful and impressive trip!

2024-11-02 | Christian Lopez |★★★★☆|📖|📍★★★|🌊 Haut |👍 Terminé

First time. Water level at the entrance we think normal, once inside after a few hours we noticed an increase of water due to thawing without problems. Anchorages well, with hardly any ice except at the beginning a little bit. (traduction alternative)
