Idrologia: (traduzione alternativa) Glaciers in the catchment area		
Accesso: Von Chur über Flims/Laax in Richtung Disentis/Mustér fahren und bei Surrein abzweigen zum Parkplatz beim Aussteig.		
Avvicinamento: Entweder fährt man mit dem zweiten Auto nach Sumvitg oder man läuft etwa 30 Minuten zu Fuss. Alternativ gibt es auch einen "Bus alpin", der für 15.- pro Person von Surrein nach Sumvitg fährt. Es gibt verschiedene Möglichkeiten für den Start, je nachdem, wie gerne man läuft oder wie lange die Tour sein soll. 1. Zustieg Gemäss Swiss Alps Canyoning Vol. 2 2. Zustieg Etwas weiter oben über einen Pfad runter zu einer Brücke. 3. Zustieg Über den Seitenfluss Acla Mulin.		
Giro: Immer wieder gibt es kristallklare Pools, die teilweise zum Springen und Rutschen einladen. Wer ein Auge für Sprünge hat, wird solche bis zu 15 Metern finden. Lediglich der erste 22 Meter hohe Abseiler ist obligatorisch, der Rest kann (nach Kontrolle der Pools) auch gesprungen werden. Beim letzten Pool, einer Rutsche mit einem 2 Meter Fall, endet die Schlucht, und man läuft noch etwa eine Stunde bis zum Auto durch eine wirklich schöne Landschaft.		
Ritorno: Ab dem letzten Pool läuft man ca. 1h bis zum Parkplatz.

Beautiful canyon with clear water. (traduzione alternativa)

Access without shuttle from the lower parking lot (50 min). At the exit of the meadows we changed to the stream and rappelled 10 and 25m on trees. All jumps are doable, the T15 is blocked by a tree at the bottom. Top canyon. 50 minutes of stream slogging to the parking lot, but that was OK. (traduzione alternativa)

We climbed via the Val Acla Mulin suspension bridge. Rock very grippy and all jumps/slides are easy to do. Comfortable with jumps/slides repeat 4.5h (entry-exit). (traduzione alternativa)

Water crystal clear as always. Everything doable except for the S8 at C22. (traduzione alternativa)

Don't be surprised if no water flows at the exit parking lot, it seeps away completely 100m further up. S8 at C22 is only about 1.5m deep. But you can take S3/S4 on the right. At R4/S4 jump into the pool on the right (about 1.5m deep), on the left there is also a small pool (not checked how deep) which probably has a kind of siphon because of the large boulder under which it pushes the water through. R4 after T7 is now a S3 (pool about 3m deep). Shortly afterwards there is another S6 on the right (pool approx. 4m deep). At T10+S2 you lightly touch the bottom of the pool. The tree trunk at T10+S2 according to the photo in Swiss Alps 2.0 is now gone, so you can make an S15 there (before T10+S2 up to the right, jump off at a large fir tree). Otherwise everything as in the topographic view. Everything can be repeated from the C22. (traduzione alternativa)
