Specialità:		
Attrezzatura: Corde: 2x30m		
Sintesi: (traduzione alternativa) Short canyon in basalt rock, nice ambience, but very slippery underground.		
Idrologia:		
Accesso: (traduzione alternativa) From Santa Cruz we take the road ER 1-2 in the direction of Ponta Delgada (northern direction, near the coast). Calculated from the northern exit of the runway of the airport of Santa Cruz we reach after about 2.7 km the center of Fazenda (de Santa Cruz). We drive through the village with the dominating church and after about 350m we come to the road bridge over "our" creek. We park our car about 250m further on, where the road to the E-Werk turns off to the right. If we have a second car available, we drive down to the E-Werk and park it there.		
Avvicinamento: (traduzione alternativa) From the car back to the bridge and immediately south of the bridge down to the creek.		
Giro: (traduzione alternativa) Walking, downclimbing, involuntary slides and 3 rappels (8m - 12m - 22m) await us. The 1st rappel goes into a pool that siphons. If the water flow is greater, be aware of the danger this poses (when rappelling, you can go out to the left without having to rappel all the way into the pool). At the E-Werk you can exit directly or continue to the last step that descends into the sea.		
Ritorno: (traduzione alternativa) From the E-Werk up the road to ER 1-2, unless you have parked a second car at the E-Werk.

Very very VERY slippery canyon. I think this was the most slippery canyon I've ever been in. It was so slippery that I thought of bringing my crampons next time. For the rest nice, short canyon, no problem anywhere. Taking a dip in the ocean was a nice ending. Did I mention it was slippery already?
