<b>Sintesi:</b> (traduzione alternativa) In good and stable weather or low water level, the Corpassa is certainly one of the most beautiful and rewarding vertical canyons in the Dolomites; very clean water; bright ausgeschliffener limestone rock; wonderful mountain scenery with deep views into the valley; very continuous canyon; many rappel in the water stream; not perfect but well set up (mostly two hooks, 10mm Inox + 8mm bolts); except for a few places very open tour; emergency exit if at all only very difficult after the first higher rappel possible (climb out left)?; mostly too graveled shallow pools; Attention danger of falling rocks by participants!); sharp edge at 28m step after the highest rappel point.		
<b>Idrologia:</b>		
<b>Accesso:</b> (traduzione alternativa) 50min  From Belluno drive in the direction of Agordo. From Agordo continue in the direction of Alleghe/Cencenighe/Cortina. In the small village of Listolade turn right towards Val Copassa (partly very narrow asphalt road). Follow the mountain road to Rifugio Capanna (large parking area for hikers).		
<b>Avvicinamento:</b> (traduzione alternativa) 1h  From the large parking lot for hikers in front of the Rifugio "Capanna Triest (1135m) follow the hiking trail 555 (forest road). After about 15 minutes you can already see the last 20m rappel to the left of the trail (water level check!). Then continue uphill on the forest road until you reach an open flat meadow. Here, descending immediately to the left, you will soon meet the stream. Entry at 1600m.		
<b>Giro:</b> (traduzione alternativa) approx. 3h  From start to exit magnificent vertical rappel canyon without long distances between the steps. If you like vertical rappels, you will fall in love with this canyon. Most of the rappels are easy to see and with some skill you can rappel outside the water stream. There are enough pitons or lugs to get safely to the partly exposed belay stations. The highest rappel point (approx. 45m) in the middle of the canyon, can be mastered without problems (only little water contact). Immediately after that comes a very impressive not visible rappelling place. This place looks wilder than it is because you rappel only a short piece at the beginning in the water and then dry in the overhang (28m). Here, however, you should be careful with the rope because of the sharp edge. After that comes a short narrow section and more nice rappel in open canyons (max 25m). At the last rappel point you can already see the hiking trail that you reach after the steps and some stone hopping at 1330m.		

**Ritorno:** (traduzione alternativa)

15min

After the stone jump, follow trail 555 back to the rifugio/parking lot. Small tip: stop at the Rifugio.

Always beautiful, even the 3rd time 📖. 2 stands could be renewed (2 stands before the high waterfall and 4th stand after the high waterfall). But it also works like this.... (traduzione alternativa)

Very beautiful canyon. Highly recommended. Various anchors renewed on our tour. However, not all anchors are in good condition yet. At the rope traverse (see photo) both anchors were destroyed, one was replaced. Rappel canyon, no swimming section but occasional pool where you can or must enjoy the fresh water. The access already offers a very beautiful panorama. (traduzione alternativa)
