Sintesi: (traduzione alternativa) Open canyon with some high rappels. Thanks to many escape possibilities and little water / rope difficulties also suitable for beginners. Tolerates a lot of water, but then you should remember that above the canyon is a dam. Popular and often walked.		
Idrologia: ACHTUNG! FLUTWELLE ! Nach längerem und stärkerem Regen kann automatische Klappe in Wienerbruck Staudamm aufgehen! Unbedingt vor der Tour kontrollieren ob der Wasserspiegel ca 1,5m unterhalb der Klappe ist (Empfehlung einer Mitarbeiter von Kraftwerk), oder direkt in dem Kraftwerk anrufen. Kontakt: https://www.mostviertel.at/alle-ausflugsziele/a-kraftwerk-wienerbruck .		
Accesso: (traduzione alternativa) Coming from Mariazell take the main road in the direction of St. Pölten until you reach Wienerbruck. In the village drive to the parking lot at the reservoir (signs: Ötschergräben).		
Avvicinamento: (traduzione alternativa) Follow the hiking trail in the direction of Lassingfall until you reach the confluence of a water-bearing ditch from the left (the canyon turns east here). In this ditch quite steeply up until you meet a forest road, which you follow in an easterly direction. At a fork, follow the forest road leading down to the entry in the Kienbach. \nIf you want to do without the rappel in the Kienbach, stay on the marked hiking trail for a bit to descend above a 4m jump into the streambed.		
Giro: (traduzione alternativa) At the Kienbach 2 rappel (10m, 25m), secured with tree slings. In the Lassingfall then another beautiful 5m possible jumps before the long abseil begins after the bridge of the hiking trail. Due to the sunny location, the rock is partly very slippery. The last big step can be done with one rappel (70m) or two rappels (40m, 25m). The belaystation for the second variant is located on the sloping slabs to the right of the waterfall (be careful in case of rain) \n\nThe tour ends with a 3m jump at the bridge before the exit into the Erlauf.		
Ritorno: (traduzione alternativa) Follow the hiking trail along the Lassingfall to the parking lot.

Relatively long canyon, open and sunny. ATTENTION! FLOOD WAVE ! After prolonged and heavy rain, the automatic flap in Wienerbruck dam can open! Be sure to check before the tour whether the water level is approx. 1.5m below the flap (recommendation from an employee of the power station), or call the power station directly.
