| Attrezzatura: Corde: 2 x 90 m | | |
| Sintesi: (traduzione alternativa) Watery rappel canyon with a long corridor at the exit. | | |
| Idrologia: | | |
| Accesso: (traduzione alternativa) From Tepelene, drive towards Kurvelesh and on towards Gusmar, cross Rexhin and park your vehicle in Nivica by the bridge. | | |
| Avvicinamento: (traduzione alternativa) Directly at the parking lot. | | |
| Giro: (traduzione alternativa) The tour begins immediately narrowly under the bridge, some jumps are possible. A few walking passages follow, then it briefly becomes open and a 25 m waterfall follows. After that, there are only extremely elaborate emergency exits. It gets narrower and is soon followed by a 65 m waterfall (divisible into 15 m and 50 m) and shortly afterwards an 85 m waterfall. After a longer walking passages, a C 40 ends the technical part. This is followed by a very beautiful 3 km long corridor, which has to be mastered by swimming and walking (1.5 - 2 h). The rock faces are up to 150 m high and in places you can touch both gorge walls with outstretched arms. | | |
| Ritorno: (traduzione alternativa) After the corridor, a stream joins from the left. Follow the streambed until you reach an old concrete structure, which was probably intended as a retention system. Here you join the track that leads back to the road. 1,5 h. | | |

The pools at the 2x 6m and the 16m jump are all extremely deep, then once a bit surprisingly silted up. At the 85m waterfall, an intermediate belaystation was lovingly placed by hand (Benji sends his regards) :P It should be relatively water-safe, rappel from the orog. right stand approx. 15m, located behind a small edge (rather far to the right, next to the watercourse, see photos). You can also get down with a 70 ropes. Whoever uses it (with proof photo) may get a beer from the builder Benji;) We wish you a nice tour, without fungus on your feet and stones in your shoes. LG (traduzione alternativa)

Perfect conditions at the moment. Canyon not very slippery, water level correct, anchors ok. 2 points would deserve to be doubled however, if a perfo goes through there (65m in monopoint and another point later with a crack very close). (traduzione alternativa)

Great canyon, unfortunately the water quality leaves a lot to be desired. We got in at 7.30am and had great sunshine in the canyon and corridor. Car parking: about 40 minutes for 23km. (traduzione alternativa)
