Attrezzatura: Corde: 2x 40m/ (1X 20m)		
Sintesi: (traduzione alternativa) Very clean and beautiful; a lot of places to slide, jump or rapel; the entry can be reached on foot, by bus or car.		
Idrologia:		
Accesso: (traduzione alternativa) From Locarno --> Biasca on the right --> in the village of Cugnasco turn left after the bridge (right camping site) and park on the left before the next bridge or cross the next bridge and park at the mill collection point (= exit 240Hm) --> at the boulders lying under the bridge in the middle you can read the water level --> if 3/3.5 boulders are washed over the tour is still possible, if the 4th boulder is washed over, there is too much water in the canyon.		
Avvicinamento: (traduzione alternativa) Alternative from the upper parking lot: From the upper (small and unpaved) parking lot next to the small one, follow the path for about 400 meters, first a short climb, then follow the saddle. Alternative On foot from the lower parking lot: about 45min. From the parking lot --> left up the road, after a few hairpin bends you will come to the sign 'Agarone' --> continue up the road --> at the next crossroads continue to 'Monti Motti' and always straight along the road --> here you will come to some nice houses and bus stops --> after a fountain (on the left) you will come more and more into the woods.) you get more and more into the forest --> at the sign 'Via Medoscio' at about 450Hm (parking) --> from here you leave the road and go right the trail through the forest a bit up --> then down to the stream at about 430Hm (entry).		
Giro: (traduzione alternativa) In this canyon there is always something to do --> right at the beginning you have several rapel (jumps) --> the short distances between the rapel or jumps you have to overcome mostly climbing --> in this canyon there are many variants to master steps (waterfalls) --> in the upper half you come to a large overgrown boulder in the middle of the canyon --> here can also be bypassed left --> after a short climbing and hiking passages comes a beautiful approx. 30m waterfall (left in the water, re. outside of the water) --> after good control you can master the next parts by jumping or sliding --> be careful at the 18m slide (very steep/li. rock) (if you don't have enough practice it's better to rapel here!) --> after the pool on the left, rapel over rock for 4m --> again on the right. hold and rapel --> now comes another 7m jump and 10m rapel --> climbing passage in the water --> short swim --> rapel 8m right and 20m left --> 3m jump left (! Caution) --> after a short swim it goes to the exit of the canyons which opens here and the bridge with parking comes into view. In 2022 all jumps were gravelled.		

Ritorno: (traduzione alternativa)

Get off at the barbecue area/ slide brake --> follow the path to the parking lot.

Automatisch importiert von Descente-Canyon.com für Canyon Cugnasco (inferieur) Super bien équipé. Dans la c30 on a fractionné au milieu sur le replat cela à évité du frottement et du tirage.3 dales recouverte au point visu débit. Fait sans navette en parkant en haut et remonté en maillot de bain sans les affaires par chemin de Lögh en 20 minutes très jolis. Good water level. Group of 6 children and 6 adults took 3:30 hours. We set up two abseiling points where possible. Unfortunately not much jumping and sliding in the canyon. Partly because the pools were too gravelly. Several higher rappels. At the exit there are two nice jumps. Climb the first one at the last pool on the left up the wall. There is a rope from the pool so that you can jump several times. The second jump from the wall on the way back. (traduzione alternativa)
