Sintesi: (traduzione alternativa)

Normally largely dry hiking and rappel canyon with some marmitas trampas. With filled pools ideal. With water flow at the exit dangerous siphon.

Idrologia:

Accesso: (traduzione alternativa)

After the A 7 has crossed the N 340 in the south of Valencia, which is also a freeway, we stay on the A 7 for another 62 km until we reach exit no. 61. Here we turn off onto the N 332 and drive about 3 km to Oliva. From here we continue on the CV 715 in a southerly direction to Pego. From there on the CV 712 in the direction of Vall d'Ebo. About 8 km after Pego we reach a plateau. At the replica of a windmill, we turn left and continue for about 6 km (alternating between dirt road and tarred road) until we reach some houses on the right of the road. At the second turn of a tarred road to the west, we find a signpost for hiking trails. Here we turn right following the signpost 'PR-V147' and park the car in the open space in front of the houses (505 m above sea level).

Avvicinamento: (traduzione alternativa)

We take the trail 'PR-V147', which first descends in a southwesterly direction, then making a wide arc to the north, to the spring fountain 'Font del Reinos'. Then it descends westward into the canyon of the Riu Girona (waypoint 38.788864, -0.136900 - 290 m a.s.l.). From here it is about 15 min. to the beginning of the Infern.

Giro: (traduzione alternativa)

Up to 12 rappel; Partly difficult to go around the marmitas trampas or climb out of them.

Ritorno: (traduzione alternativa)

After the half-cave 'Cova Santa' and the exit of the technical-sporty part, we continue for about 30 minutes in the bed of the Rio Girona (keeping left at a fork). Then we reach the place where the path that descends from Fleix on the right slope in precise serpentines crosses the riverbed (180 m above sea level). We follow the path the left slope until we reach the road again at the height. On it a few hundred meters and we are back at the signpost and the nearby car.

Automatisch importiert von Descente-Canyon.com für Canyon Infern Nous avons été jusqu'au départ en camping-car sans problème! Pas eu besoin de combi malgré les pluies de la veille.Les vasques s'évitent sans soucis. Chèvre sans tête en décomposition dans le 1er trou piège. Joli canyon malgré la marche d'approche et de retour! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21272/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Infern Nice canyon, all pools can be avoided with a little accrobacy and airy handlines (in good condition), which can be tiring on the arms. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21272/observations.html>)
