Sintesi: (traduzione alternativa)

Climbing again with ascenders should be mastered! During our ascent, fixed ropes were available everywhere for the return ascent. However, one should not assume that the ropes are everywhere. Beautiful sinter curtains and washed out pools; the canyon opens into the sea; depending on the water level 1 siphon / clamping block; in summer mostly dry.

If necessary, take rope remnants for resurgence.

Idrologia:

Accesso: (traduzione alternativa)

From Port de Soller at the 1st traffic circle direction Soller. Through the tunnel and continue to the 2nd traffic circle. Here left direction Pollença. At the village Fornalutx driven past, comes after a narrow right hairpin bends, the viewpoint "Mirador de Ses Barques" (1st parking possibility). From the asphalt road at the viewpoint you follow the gravel road (large stones and holes!) To the managed "Balitx d'Avall down (limited parking). To park here should be asked before or consume something. Alternatively, the way can be covered on foot (about 1h).

Avvicinamento: (traduzione alternativa)

From "Balitx d'Avall" do not immediately climb into the streambed, but follow the path to the left. Climb over the fence and continue orographically to the right of the canyon, follow the gravel path about 200m to an open place, here you can easily descend into the canyon (stone wall steps).

Giro: (traduzione alternativa)

The Na Mora is a beautiful and not too demanding canyon with some nice pools to jump. Since usually back up through the canyon on fixed ropes, it should not be underestimated in terms of strength. The canyon can be divided (1st part to Cala Ferrera) or further to the sea. The 1st part is very open with only a few narrows. From the middle (Cala Ferrera) the canyon becomes increasingly narrow and continuous. If the water level allows it, the rope can be omitted except for a few places (! only for the descent!) Alternating jumps, downclimb, slide and short swimming passages follow before you reach the sea.

Mostly all rappels (12m,6m,10m,9m,10m,5m) are equipped with fixed ropes which allow you to climb back over the ropes (ascenders!) if the way over the sea is not possible. However, you should not rely on the presence of these ropes and take enough rope yourself. \Once at the sea, swim out through a narrow channel, then turn left and swim through two bays before coming ashore in front of a rock about 15m high (impossible even with moderate waves, so watch the weather forecast). Swimming distance about 500m. In the erosion slope above the rock begins a path that leads steeply and with difficulty back to the access path.

Ritorno: (traduzione alternativa)

Our recommendation is to climb back up the canyon. Alternatively, can be left via the via ferrata-like exit before the sea (but long way back 2-3h).

If you swim:

Coastal path back to the lower parking lot.

Automatisch importiert von Descente-Canyon.com für Canyon Na Mora Pas d'écoulement dans le canyon, reste de l'eau dans quelques vasques permettant des sauts. Eau croupie malgré les pluies de la veille. Equipement fixe sauf sur un ressaut de 5m. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2838/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Na Mora Les vasques sont encore claires.il faut en profité rapidement. Des cordes fixes étaient tonchées on les a coupé par secu.Tres bel encaissement final .On est rentré par la mer .Top (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2838/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Na Mora Fait avec Sebubble, on a adoré le canyon et sa sortie par la mer.ça ne coule plus (au moins en surface mais les vasques étaient encore baignable. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2838/observations.html>)

2024-05-04 | System User | |📖|📌|🌊 Secco | 🍏 Completato

Automatisch importiert von Descente-Canyon.com für Canyon Na Mora Descendu en intégral avec sortie par la mer, plus rien ne coule, certaines parties sont déjà sèches, mais la plupart des vasques sont encore en eau et permettent une descente ludique, la partie sup est équipée en fixe comme la inf, il suffit de prendre une corde de 30m pour la C12.Fait à 7 avec un super groupe venu de France et contacter via DC ! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2838/observations.html>)

2024-05-01 | System User | |📖|📌|🌊 Basso | 🍏 Completato

Automatisch importiert von Descente-Canyon.com für Canyon Na Mora Ça coule faiblement dans les parties encaissées et toutes les vasques sont claires. Bcp de cordes en place, la plupart en bon état, seule la C15 est à fixer pour pouvoir remonter. Canyon pas majeur mais joli, à faire pour l'encaissement final et l'arrivée dans la mer. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2838/observations.html>)

A dream day. Although there was no more running water, the pools were still well filled with water and allowed a jump or two. Water quality still ok but not for long. From the emergency exit onwards, the lower part was dry but still a great section of the gorge. Towards the exit, the pools filled up again and the water quality was no longer good. Exit into the turquoise more. And back to the port of Soller by boat. All in all, a mega day with sunshine and blue skies (traduzione alternativa)

2024-04-03 | System User | |📖|📌|🌊 Secco | 🍏 Completato

Automatisch importiert von Descente-Canyon.com für Canyon Na Mora Pour y accéder, il faut éviter au maximum la route et privilégier les sentiers, il y a de nombreuses portes barrées. Pas de débit, mais des bassins toujours pleins. Ils commencent à croupir, mais sont encore dans un état acceptable. Cordes fixes un peu partout, certaines endommagées, attention ! Retour en bateau au port de Sòller pour 20 € par groupe de 9. Numéro du batelier +34 626 89 24 93. Nous avons demandé une récupération en mer à mortitx, ils nous ont répondu que cela coûterait le double. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2838/observations.html>)

2024-03-28 | Klara Skopal | ⭐⭐⭐ |📖|📌|🌊 Basso | 🍏 Completato

The description and some of the GPS points didn't match at all, it was quite a search between umpteen closed off paths, tedious. The canyon was then (despite rain the day before) either dry or filled with horribly stagnant pools. Ropes for the ascent were available except for 2 places in the last 7 abseils to the exit. There were also many fixed ropes in the upper part. (traduzione alternativa)

2024-03-24 | Joey CIA | ⭐⭐⭐⭐ |📖|📌|🌊 Basso | 🍏 Completato

A great day, first part up to the exit possibility full pools and partly the water is still walking very little, second
