Specialità:		
Attrezzatura:		
Sintesi: (traduzione alternativa) Scenic, narrow gorge with quite alpine access.		
Idrologia:		
Accesso: (traduzione alternativa) On the B115 between Hieflau and Eisenerz turn off in the direction of Radmer a.d. Hasel. Follow this road for about 5km until a deep valley enters from the left. Before the bridge right parking for about 3 cars.		
Avvicinamento: (traduzione alternativa) From the parking lot briefly on a forest road to transmission tower, then over well-trodden hunters path up the left flank. After an unpleasant traverse of a landslide quite exposed traverse 100m above the valley floor. After about 50 minutes the path meets the stream again. Here is the entry.		
Giro: (traduzione alternativa) After 10 minutes of block hopping, you are at the beginning of the gorge and at the first rappelling point. From here no emergency exit is possible. In the gorge, rappelling points up to 13m alternate with walking / downclimb passages. Scenic, the whole thing is very impressive, partly the gorge is so narrow that no sunbeam comes to the bottom, with suitable water level (estimate at the first rappel point) but not too demanding. Go only in good weather. Due to the rocky catchment area, changes due to debris are possible.		
Ritorno: (traduzione alternativa) After the exit of the gorge always in the streambed to the parking lot.

Narrow cold canyon with challenging approach - approach route partly crossed by trees. A lot of cragging at the start (more than in 2022), some of the stances rusty and bolts loose. But in July 2023 still ok for abseiling. Watch out for loose stones when abseiling. (traduzione alternativa)

Currently good water. Unfortunately, a few more trees in the gorge than last season. Not yet disturbing. Hooks are still ok or could be better. Watch out on the approach. (traduzione alternativa)
