Specialità:		
Attrezzatura: Corde: 2x 40		
Sintesi: (traduzione alternativa) Technically challenging, beautiful aquatic canyon with crystal clear water and deep pools; many possible jumps; several rope traverses allow to bypass dangerous places, but problematic at high water levels.		
Idrologia:		
Accesso: (traduzione alternativa) From Biasca go through the village of Iragna --> continue towards Lodrino --> in the village of Rodaglio turn right at the little church and go up the mountain road until the first bend --> here turn right --> follow the road until the village of "Citt" (bend in the serpentine) --> parking is before or after the bend in the serpentine (do not park in the bend; only for locals).		
Avvicinamento: (traduzione alternativa) By car the access is shortened to 20min --> from the parking lot you go back to the serpentine curve and continue the slightly sloping path through the mountain village "Citt" --> at the signpost continue to the left in the direction of Pön --> after a few minutes there is another fork --> here right down to the stone bridge --> entry at about 730Hm. If you do not have a shuttle car, you can take the footpath from the village of Iragna, which leads up to the entry in about 1.5 hours.		
Giro: (traduzione alternativa) The Iragna superiore is one of the most beautiful canyons in Ticino --> the upper part can be well combined with the intermedio --> the water level should be checked before the very aquatic canyon, absolutely --> below the bridge is r the first and highest abseil (36m) which leads directly in the water course, into the breathtaking scenic landscape --> technically demanding rappels alternate with jumps and short walking passages --> a rope traverse is often needed to safely reach the exposed belay stations (there are plenty of pitons for this purpose)--> most of the jumps require a good jumping technique and control of the water depth in the pools --> the current should not be underestimated --> at the trickiest points, it is usually possible to rappel outside of the water flow --> if you only want to walk the Iragna superiore, look for the exit at approx. 510Hm left the exit over the slope (open canyon section before the next rock face and downclimb) --> in most cases, however, the Iragna intermedio is done at the same time (short part) --> if you also decide for a part or the whole Iragna inferiore, time and equipment should be considered!		
Ritorno: (traduzione alternativa) At the end of the "superiore" at 510Hm left the exit over the slope (open gorge section before the next rock wall and downclimb) onto the hiking trail. Follow this path down into the valley.

Quite slippery, all anchors in order, clear water with good/low level. Superiore + intermedio + inferiore in 4h30 in a group of 9.
