Specialità:		
Attrezzatura: Corde: 2x40m		
Sintesi: (traduzione alternativa) Longer and more technical than the upper part. Many angled and sometimes painful slides.		
Idrologia: (traduzione alternativa) If necessary, water supply from the interconnected reservoir canal leading to the power plant (automatic opening of the sluice in case of problems in the canal or in the power plant, as in the case of the accident in 2001: https://www.nzz.ch/article7KF2C-ld.179745).		
Accesso: (traduzione alternativa) As for Nala inferiore: from the freeway junction north of Bellinzona, take the N2 towards Biasca. Via Claro and Cresciano we arrive to Osogna (11,4 km from freeway to the bridge over the Nala). After the bridge over the Nala, drive up to the cemetery and leave the car there.		
Avvicinamento: (traduzione alternativa) Walk along the path above the parking lot towards the river and descend to the large final basin. Check the water flow, then cross the riverbed to the south and hike along the narrow mountain road to the beginning of the trail to Pönt and Valle di Osogna. After the steep climb to Pönt, the trail flattens out and then enters the Valle di Osogna. At the bridge at 839m the entry starts.		
Giro: (traduzione alternativa) Between C27 and C19 danger of falling rocks. Highlight of the part is the very narrow cut C23. If the water level is too high for four participants, one must go through and below set up a rope ferry (then at least 35m of rope required, anchors are available).		
Ritorno: (traduzione alternativa) Either exit to the right at the beginning of the Nala inferiore and go down the path to Osogna or continue down the Nala inferiore to its exit (see under "Nala inferiore").

Rock was very slippery and anchors were in good condition. Some slides were doable. (traduzione alternativa)

2h15 approach on foot to superiore, 6h30 tour for superiore + intermedio + inferiore in a group of 7. Water level normal without any problem, superiore with low flow as usual but with cristal clear pools and lot of water entering from the tributary right after the first stone bridge; all jumps and toboggans doable. All anchor points in order, in superiore and intermedio many are single.
