Paese: España / Spain Regione: Cataluña / Catalunya Sottoregione: provincia de Gerona / Provincia de Girona Città: Sadernes		
Difficoltà: non così difficile	Grado: v3 a2 II	Tempo totale: 6h20
Tempo avvicinamento: 2h30	Tempo giaro: 2h30	Tempo ritorno: 1h20
Altitudine di entrata: 660m	Altitudine di uscita: 440m	Altitudine delta: 220m
Lunghezza del canyon: 1350m	Rapel più alto: 19m	Quantità rapelli: 14
Transporto: a piedi	Tipo di roccia:	Area di ingresso: km ²
Stagione:	Orientamento: Sud-Ovest	Tempo migliore:
Valutazione: ★ 2.9 (1)	Info: ★ 0 ()	Belay: ★ 0 ()
Avvertenzas: <i>Trockene Gumpen: Kesselfalle (Marmita Trampa)</i> Gumpen, der entweder kein Wasser hat oder der Wasserspiegel nicht bis zum Rand des Gumpens reicht. Damit kann ein Herausklettern evtl. nicht möglich oder zumindest schwierig sein.		
Specialità: § Regulated, Autorizzazione necessaria,		
Attrezzatura: Corde: 2x30m		
Sintesi: (traduzione alternativa) Largely open, friendly. Rappel canyon with fun potential		
Idrologia:		
Accesso: (traduzione alternativa) From Figueres, on the Perpignan - Barcelona freeway, we take the N 260 westwards and after about 22.5 km we pass the interesting town of Besalu and continue on the A-26 for another 10.5 km. Then - exit no. "75", "Montagut" - we turn right onto the GIV-5233. 2 km further on we pass through the village of Montagut and at the end of the village we turn left onto the GIV-5231 in the direction of Sadernes. 2 km further we pass the entrance to the comfortable campsite Montagut and after another 3.8 km we come to the hamlet Montagut (also with camping facilities).\n\n We continue our ride on a dirt road that first goes west , then north uphill along the small river. 2.7 km after Sadernes we come to a junction and park our car a few meters after the junction on a parking lot for hikers on the right.		
Avvicinamento: (traduzione alternativa) We first go back a few steps to the junction and then take the forest road that leads down to the streambed of the Riera de Sant Aniol. We follow the path, cross the stream and after 1.6 km from the car we reach a large meadow. Here the path bends away from the stream to the left. However, we continue to follow the stream and after about 160 m we come to a small weir. Here either on its crown or a little below on the other bank.\n\n On a path now in the valley further north. In the further course of the path we cross the stream three times and finally come to the former monastery St. Aniol d'Aguja.\n\n Continue in a northeasterly direction, first again over the Riera de Sant Aniol, then the other side slope on a clear way uphill. On a hilltop - Coll de Clarióles, about 555m above sea level - the path branches. On the left we would go to the entry of the St. Aniol, but we go to the right, leaving later a path on the left up unnoticed and coming to the spring Font de Sant. Continue along the path until it turns right into the streambed of the canal (entry).		

Giro: (traduzione alternativa)

Varied and enjoyable descent until a sign indicates the exit from the canyon - "Cami de Sortida". If there is still water flow here, we recommend a further descent to the karst spring, where the stream flattens.

Ritorno: (traduzione alternativa)

Following the trail downhill we come to our approach path, which we then follow back to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Las Canals Toujours magnifique, eau froide au debut aquatique, chaud à la fin. Autre groupe derriere nous sinon calme. Bon debit au debut, sans debit apres la marche du milieu mais vasques toutes pleines. Sauts passent bien, ca saute bien! mais cest la fin pour la saison, la semaine prochaine la partie apres marche sera croupissante. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/21114/observations.html>)
