Paese: France Regione: Provence-Alpes-Côte-d'Azur / Provence-Alpes-Cote d'Azur Sottoregione: Alpes-de-Haute-Provence Città: Prads Haute Bleone		
Difficoltà: un po' difficile	Grado: v4 a3 V	Tempo totale: 5h45
Tempo avvicinamento: 2h	Tempo giaro: 3h40	Tempo ritorno: 5min
Altitudine di entrata: 1600m	Altitudine di uscita: 1250m	Altitudine delta: 350m
Lunghezza del canyon: 2600m	Rapel più alto: 25m	Quantità rapelli: 14
Transporto:	Tipo di roccia:	Area di ingresso: km ²
Stagione:	Orientamento: Sud	Tempo migliore:
Valutazione: ★ 3.6 (1)	Info: ★ 0 ()	Belay: ★ 0 ()
Specialità:		
Attrezzatura: Corde: 2x30m		
Sintesi: (traduzione alternativa) Alpine canyon without higher rappels, lower part of Male Vesse.		
Idrologia:		
Accesso: (traduzione alternativa) From Digne-Les-Bains on the D 900 14 km in the direction of Gap or from Gap 90 km (also on the D 900) in the direction of Digne as far as the village of La Javie. From here, head east on the D 107 and up the Bleone valley to Prads (12.5 km from Javie). Continue along the Bleone. After about 4 km, take the road on the right and continue to the barrier.		
Avvicinamento: (traduzione alternativa) A few meters after the parking lot, you cross the streambed of the Male Vesse, where the water may be hidden under the gravel. About 30 m further on, at a pile of stones about half a meter high, turn left off the track and follow the tracks up into the forest. From now on, follow the cairns that continually point the way. If you lose contact with them, it is essential to find them again. So you walk up through the forest for around 45 minutes; then you come to a cirque ("ebolis" - chute, landslide?). The path branches off here. One leads up to the right in the cirque (the chute), but gets lost in the forest after two cairns. So we take the other one, which leads to a tree lying across the path (literally: crossing the path). Shortly afterwards, you will see another small cairn. Unfortunately, there are only red trail markings on the opposite side of the trees. After about 1 hour and 20 minutes, shortly after a rock face on the right-hand side, we reach another large cirque, which we do not cross, but instead walk steeply up to the right at the cairns in front of the cirque. Here we follow a chain of cairns. We come to a footbridge 130 m above the canyon (directly above the Oscuros). Then, continuing to follow the cairns, we climb to the right, cross a small cirque and a few minutes later we reach another path in which we descend steeply between trees to the streambed. (Translation of a French description of this access, as the author reached Male Vesse aval -III- via Male Vesse amont - II -. Caracal describes this route in the opposite direction as an emergency exit after the upper part - "Echappatoire" - see page 51 below).		
Giro: (traduzione alternativa) The descent begins with a short dark gorge with the highest rappel (C 25), then narrower and wider rappel sections alternate, almost 20 rappels, some slides and possible jumps are offered.		

Ritorno: (traduzione alternativa)

In the wide streambed you reach the crossing slope. Follow this to the right for a few meters to the vehicle.
