<b>Sintesi:</b> (traduzione alternativa) dark gorge		
<b>Idrologia:</b>		
<b>Accesso:</b> (traduzione alternativa) Leave the city center of Grenoble via the Isère to the NNW and head for the suburb of St-Martin-le-Vinoux on the D 57 (also possible from St Engrève). Now head uphill towards Quaix-en-Chartreuse. About 1 km before this village, the road bends sharply to the right across a side valley of the Vence. Immediately afterwards, park in the excavation pit on the left.		
<b>Avvicinamento:</b> (traduzione alternativa) A few meters back on the road, then a dirt road between forest and meadows descends in a south-easterly direction. On a flat saddle, before the path climbs again, an inconspicuous track runs off to the left (south-east) into the bushes. Follow this - steeply at the end - down to Vence and the entry to Infernet.		
<b>Giro:</b> (traduzione alternativa) The difficulty depends crucially on the - usually quite decent - water flow. Although the stands are usually set up in such a way that you avoid the jet as much as possible, access to the stand above the 25 m rappel is quite exposed. Whirlpools and rollers then pose a further danger. Video and photos show a low water flow! Good to combine with Alloix.		
<b>Ritorno:</b> (traduzione alternativa) After the canyon exit, before the water catchment, turn right up to the aforementioned saddle and from here back to the car.

Waterflow is already lower then a few days ago. We used on both trips the higher entrance.

Higher water level then normal. Higher entrance necessary. We used a floating bag in some places. But in the canyon we used all the anchors in the flow for training. Photo 1: Higher then normal but all good. Photo 2: Big flow  
📖 Photo 3: Crazy flow, we didn't commit. If you go bring the right equipment and a good team.
