Sintesi: (traduzione alternativa) Small forest canyon with some possible jumps		
Idrologia:		
Accesso: (traduzione alternativa) From Bad Tölz on the B13 via Lenggries to the Sylvenstein reservoir. Turn left over the dam crest and on the B 307 until you meet the branch of the B307 coming from Tegernsee via Kreuth (29 km to this point). Here now on the right we pass after a few hundred meters the old border station and come 1.7 km after that to the inn "Hagen", which lies to the north of the road. We still cross the Walchen and turn right after the bridge in the direction of a chapel. There we can park our car on a parking lot for hikers. \n\nlf we come up from the Inn valley, we pass Achensee and Achenkirch on the B 181. 6.8 km after Achenkirch we reach the destination indicated above.		
Avvicinamento: (traduzione alternativa) We take the forest road that starts at the chapel and goes up in a southwesterly direction ("Rotwandalm"). After 450 m we pass a track that branches off to the left, keep straight on. After another 650 m we come to another fork and stay right here. A little later we come to the bridge over the Taschbach. Immediately after the bridge, we go down to the right on indistinct tracks to the stream.		
Giro: (traduzione alternativa) The access is after the "slide", which can not be slid. This is followed by a river walk with a large number of smaller steps, which can usually be slid or jumped.		
Ritorno: (traduzione alternativa) Either head for B 181, as described by Riml/Amor, or exit to the right at the end of the gorge and follow the southwest edge of the fenced meadow, first on faint tracks, later pathless, to the exit track and down to the car.

Today, together with "da-schluchtlert", I removed some of the wood and got the canyon in shape. Jumps and slides partly doable - with soft knees ;-) Cool guys, cool day, thanks. (traduzione alternativa)

Most pools still are not deep enough to jump. The big slide is slowly getting a bit deeper, but still only around hip-deep. Some newly fallen trees are in the way here and there, should be cleared away before the beginning of the commercial season. Zipline is still up.

Automatisch importiert von Descente-Canyon.com für Canyon Taschbach Nice, short canyon. Only minimal amounts of snow present. All anchors in good condition. Perfect as a short stop on a travel day ;) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/23942/observations.html>)

Stands ok. Gumpen pretty much gravelled up. At the steel cable tyrolienne should be hunted down so far from the wire rope that you have so much ground under your feet on arrival that you can untie yourself (photo). This time we walked out in the stream according to the description in Amor/Riml in the direction of the Ache and have set there a Steimännchen, where we climbed up the embankment onto the path to the road (photo) (traduzione alternativa)
