Attrezzatura:

Sintesi: (traduzione alternativa)

Long, impressive tour with wild access.

Idrologia:

Accesso: (traduzione alternativa)

SS203 from Belluno Ri. Agordo, at Ponte Mas turn left towards "Valle del Mis". After a few tunnels and a bridge, park at the Pian Falcina restaurant.

Avvicinamento: (traduzione alternativa)

Follow the marked nature trail into Valle Falcina. After about 15 minutes you will cross two streams before the path becomes steeper. At the exit of this slope, a path branches off to the right (N 46.1626809 E 12.0492249). Follow this path upwards over the wooded ridge, the path is always clearly visible. At the first fork, stay to the right, and at the second fork, go up to the left. A long ascending traverse begins. When you reach a dry streambed, follow it uphill for a short while before cairns guide you to the left again. The path remains always visible, but hides in the open terrain in the high grass. Continue to climb crosswise, below a high rock wall a very inconspicuous path branches off to the left (two red dots, possibly the emergency exit), here keep right and climb in many hairpin bends to an old hunter's shelter. Continue left across a watercourse and cross less steeply high above the valley floor. After crossing a dry streambed you reach a larger tributary. Cross this and follow the path, which is not very visible from here, for about 50m to a ridge covered with mountain pines. Here (N 46.1651739, E 12.0286065) you cross to the left, the hunters path that we have followed so far leads straight up the slope.\n\nFrom here there are hardly any trail tracks, the wayfinding is only possible through many cut marks on branches / lats and a few cairns. First traverse briefly, then descend very steeply 20hm through an earthy chute before reaching another long traverse over a short rocky ledge. You cross a path below a beautiful waterfall, climb very steeply on the far bank before a last, partly exposed traverse leads to the valley floor. You reach the stream below a small gorge with several waterfalls. \nDo not descend too early, the stream cuts deep very quickly. The access path is registered in the OSM.

Giro: (traduzione alternativa)

Waterfall steps up to 45m in beautiful canyon without gravel or boulder climbs, after 3/4 of the tour escape possibility to the left (stone men). In the last quarter of the tour, the canyon unfortunately loses its attractiveness. Protection in the upper three quarters good, in the lower part then mainly clamp block slings.\n\n * downclimb 3m, slippery\n * C 5m: anchor right\n * small slides\n * C 4m: rope loop left (under grass)\n * C 14m: anchor right, possibly jumpable\n * C 30m: 2 anchors right\n * C 18m: Rope loop around tree right\n * C 13m: anchor right\n * C 3m: anchor right\n * C 28m: 2 anchors right\n * C 5m: anchor right\n * C 4m: anchor right\n * C 40m: 2 anchors right\n * C 4 + 11m: Hooks left, climb over the clamping block\n * 2 jumps to 4m\n * short walking passages\n * C 22m: 2 hooks left\n * C 37m: 2 hooks left\n * C 16m: hooks left\n * C 12m: hooks left\n * short walking passages, at the exit escape possibility left\n * C 18m: 2 hooks left\n * C 10m: hooks right\n * Rock layers from here rather vertical and many blocks in the streambed. Much to downclimb, and three rappel, the first two from Klemmblockschlingen, the last from an anchor on the left side\n

Ritorno: (traduzione alternativa)

Follow the marked hiking trail with just under 100m of counter ascent back to the parking lot.

All good. Access only the last 400m of the traverse a bit wild, otherwise good path. (traduzione alternativa)
