Very beautiful landscape, not very challenging with our low water level. The road to the entry is not particularly good. We managed it with our small, low rental car, but something bigger would certainly be more comfortable. Contact the HEC operator. Our contact couldn't speak English, it's best to contact them by text so they can translate. He may also be able to organize a shuttle. The drill hooks are often very high so that they last longer, so look up when searching:) (traduzione alternativa)

Great canyon. Some of the anchors were high/involved some polished scrambling to get to - recommend good shoes or confidence. Canyon is very straightforward from start to finish. We contacted Lindor from HEC and he registered us/made sure no hydro operations were taking place and gave us a lift to the canyon start (approx 1hr) for 50€ (2 people) - well worth it. Otherwise you'd probably want a car drop. If you need his contact details please DM me on Instagram @thisistraveling and I'll share his WhatsApp details (he prefers text). He asked to please text him 2 days in advance so he can tell you if HEC are doing operations. Enjoy!

Many thanks to Lindor Carciu for the cab service. Once at the top, we were even allowed to use the Hec toilet. We were escorted to the stream, where no water was flowing. A little later, a little water came in from the right of the overflow. Great tour, all the stalls were there. (traduzione alternativa)

We made contact with Mr. Carciu of the Tervolit HEC before our descent as suggested by Pascal in the guidebook. At the hydro dam all water was taken into another capture so we started completely dry. There is a local man living next to the dam, he is also very concerned about your safety and reminds you if there is permission of the HEC to enter the canyon. The canyon was easy, climbing and sliding and some descents. One bolt was missing so we had to make an extra long descent at one of the stations. The original bolt was cut off by debris, this happened already several times according to Pascal. The last part of the canyon was an easy walk out, there are some (hot) springs along the high canyon wall. This canyon is highly recommended. And if you have energy and time enough it could be combined with the Gjërzejë canyon next to the entrance of the Holtit. (traduzione alternativa)
