Attrezzatura: Corde: 2x40m,1x30m,1x20m Utensile da trapano,		
Sintesi: (traduzione alternativa) Alpine high mountain gorge, long and challenging, no jumps or slides.		
Idrologia:		
Accesso: (traduzione alternativa) From the Inntalutobahn exit Schwaz to Fiecht, continue in the direction of St. Georgenberg. Via Weng (turn left) to the building yard and continue on a dirt road to the parking lot (P) Bärenrast (1010 m).		
Avvicinamento: (traduzione alternativa) From the parking lot on the slope further to the Stallenhütte (1340m altitude). Now we take the hiking trail via the Graf-Thun-Hütte up towards Naudersalm. We come up to the Rizuelhals (1943m altitude), where the hiking trail branches. From this saddle we look for the best "way" crosswise down to the Naudersbach (E1).		
Giro: (traduzione alternativa) see http://canyon.carto.net/cwiki/bin/view/Blogs/Gamsgartenklamm_Tirol		
Ritorno: (traduzione alternativa) Where Gamsgartenbach and Stallenbach flow together (A1), pathless on the opposite slope almost 200 meters in altitude up to the slope. Alternatively (e.g. in the dark) there is also the possibility to go down the Stallenbach to the bridge (A2). Left of the Stallerbach is in old maps (see also map in photo gallery) on this route a path recorded - in sections also recognizable on Google Earth - but it should be hardly usable today because of landslides and lack of maintenance and access.

Automatisch importiert von Descente-Canyon.com für Canyon Gamsgartenklamm Magnifique canyon. Longue et belle approche, très belle descente dans un encaissement profond et très continu. Equipement au minimum, ça passe mais quelques points en plus seraient les bienvenus. Retour, droit dans la pente jusqu'à trouver une sente qui en la suivant vers la gauche ramène au parking. Automatisch importiert von Descente-Canyon.com für Canyon Gamsgartenklamm Grande et belle course, faite par le plus grand bras. Compter facile 3h pour l'approche. filet d'eau au debut et gros débit à la fin. Équipement minimaliste voire insuffisant pour une course de cet intérêt, il faut savoir improviser. Walked the western parts (Naudersbach). A lot of downclimbing, extremely slippery. 1 anchor newly drilled - remaining anchors were in good condition. (traduzione alternativa)

We entered the Naudersbach (left, western tributary) this year, but it is less attractive because of the long walking and descending routes and few rappels. In the Naudersbach we drilled 2 pitons. In the lower part of the Gamsgartl still 6 stands. 2022 (entered via Gamsbach) we drilled 10 holds, which were all still there. Have dismantled some old drill bits and dilapidated stands. Thus the Gamsgartl is again relatively well rehabilitated, nevertheless much experience and condition necessary! Less water than last year in September, but in the lower part many springs are added!
