<b>Sintesi:</b> (traduzione alternativa) Dark canyon for rappeling, almost unique		
<b>Idrologia:</b>		
<b>Accesso:</b> (traduzione alternativa) Coming from Lleida, we take the C-13 through Balaguer and Tremp to Pobla de Segur (97.8 km). We go up to the right into the town and continue on the N-260 towards Sort. 6.8 km after Pobla de Segur (town center) we come to a tunnel. On the old road outside the tunnel would be the ideal parking place, but the access here is closed to motor vehicles. Also directly at the access to the old road one can park badly. So we have in our last visits this tunnel still crossed and then parked the car 2 km further before the next tunnel access (more space).		
<b>Avvicinamento:</b> (traduzione alternativa) We walk back on the road in a southerly direction, take the old road on the left at the tunnel entrance and walk on it for another 450m. Here we see the rope spanning the river for the return transport, then the inconspicuous canyon exit and finally come to another rope that spans the canyon since about 2009. In the past, one was required to swim across the Rio Noguera Pallaresa on the access, and even earlier one had to swim on the way back. First, therefore, by means of steel rope and pulley(s) across the river. Beyond up the slope, we meet a slope, which we then follow to the left to the entry.		
<b>Giro:</b> (traduzione alternativa) First running routes, in between a 9m rappel. Then in the beam (also possible outside) 20m down into the underworld. Under a roof of rocks further. Again 3 rappel, possible jumps and slides.		
<b>Ritorno:</b> (traduzione alternativa) Not out to the river, but before up to the right and beyond the ridge then to the steel cable.

Automatisch importiert von Descente-Canyon.com für Canyon Infern Infern fait dans de grosses conditions, bien sombre et avec pas mal d'eau dus aux orages ces dernières jours, et le jour même. Nous avons hésité à nous engager mais un guide nous a assuré, ce qui est vrai, qu'il n'y avait pas de difficulté particulières, même avec beaucoup d'eau.Nous sommes même passé dans l'actif au 2ème rappels, à savoir l'infern à proprement parlé. En clair, super. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2753/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Infern Première fois dans ce canyon, la grotte se fait, assez impressionnant, on a pied dans toutes les vasques. On a trouvé le débit correct.ATTENTION : Bien freiner sur les tyro (contre assurage, avec mousqueton sur le câble ou autre), surtout celle du retour (on prend beaucoup de vitesse) au risque de se prendre l'arbre !!
