Paese: France Regione: Auvergne-Rhône-Alpes Sottoregione: Ain Città: Artemare		
Difficoltà: un po' difficile	Grado: v3 a4 III	Tempo totale: 2h45
Tempo avvicinamento: 5min	Tempo giaro: 2h30	Tempo ritorno: 10min
Altitudine di entrata: 370m	Altitudine di uscita: 250m	Altitudine delta: 120m
Lunghezza del canyon: 1000m	Rapel più alto: 13m	Quantità rapelli:
Transporto:	Tipo di roccia:	Area di ingresso: km ²
Stagione:	Orientamento: Sud	Tempo migliore:
Valutazione: ★ 4.3 (3)	Info: ★ 0 ()	Belay: ★ 3 (1)
Specialità:		
Attrezzatura: Lampada frontale,		
Sintesi: (traduzione alternativa) Watery dark gorge with rappel canyon (fun character)		
Idrologia:		
Accesso: (traduzione alternativa) After bypassing Geneva on the Swiss N 1 after the national border, take the A 401 towards Lyon, Dijon, Paris for about 2.5 km, then at the highway junction continue on the A 40 towards Lyon, Dijon, Paris. After another 23 km, take exit 11 (Bellegarde Center) in the direction of Fragny, Seyssel. 6 km further on, at the end of Mons, turn right onto the D 992 and drive through Seyssel and Culoz (another 23 km), where you continue on the D 904 (towards Bourg-en-Bresse) for another 8.5 km to Artemare (a total of 62 km from the border).\n\nIn Artemare, we drive straight ahead at the prominent left-hand bend (Rue de la Poste), cross the D 31 (Cote d'Yon) at Place de la Liberté and drive along Rue du Stade towards the school district. We then park the vehicle on the left below the road under the trees (at the sports field)\n\nWith the other vehicle, we return to Place de la Liberté and turn left onto the D 31 (Cote d'Yon). The road winds its way up to the hamlet of Don. 2 bridges over the Groin are left behind. About 200m after the Pont du Diable (2nd bridge), where the Groin has not yet deepened, we park the second vehicle.		
Avvicinamento: (traduzione alternativa) From the car we walk along the streambed to the dam.		
Giro: (traduzione alternativa) At the entry point, there is a small power station operating house; at this, a red-green traffic light for the ravine users (but only for power station operation! - (Regulation only for power station operation, not with regard to the general water level). Access from the right side (tree) directly before the 1st siphon (jumps possible from both sides).\n\nLe Groin is a relatively short but attractive canyon with two different parts, an unproblematic siphon and many possible jumps. In spring, when the meadows above are being fertilized, you should not necessarily enter. There are also some inflows from the houses above the canyon.		
Ritorno: (traduzione alternativa) At the second large pool (C6 to C7), where the rock walls recede, you can exit left onto a pad that leads to the lower parking lot. You can also take the next C8 rappel and then exit to the left.

Automatisch importiert von Descente-Canyon.com für Canyon Groin Debit descendant estimé à 0.7m3 sec, pas de difficulté majeure. Pas de mouvement d'eau (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2175/observations.html>)

2024-09-15 | System User | |📖|📌|🌊 Normale | 🟢 Completato

Automatisch importiert von Descente-Canyon.com für Canyon Groin Rien de particulier, tout passe. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2175/observations.html>)

2024-09-14 | System User | |📖|📌|🌊 Alto | 🟢 Completato

Automatisch importiert von Descente-Canyon.com für Canyon Groin Plus gros débit pratiqué dans ce canyon pour ma part. On est allé voir la source avant la descente pour être sur vu qu'il avait plu les jours précédents. Le premier syphon passait encore tout juste la tête hors de l'eau. On a quand même shunté la grosse cascade dont le rappel est bien dessous (celle où il faut la lampe et où l'amarrage est vraiment en bord de cascade), en passant par la courte escalade à gauche (barreaux métal en hauteur). Pour le reste toujours aussi beau et frais! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2175/observations.html>)

2024-08-18 | System User | |📖|📌|🌊 Normale | 🟢 Completato

Automatisch importiert von Descente-Canyon.com für Canyon Groin La résurgence est très basse, le barrage à 5cm de déborder, le débit tranquille 0.09m3/sec. L'eau est encore plus trouble qu'en début de semaine, du aux pluies de la veille. L'eau se rafraîchit nettement après le passage souterrain. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2175/observations.html>)

2024-08-17 | System User | |📖|📌|🌊 Normale | 🟡 Non fatto

Automatisch importiert von Descente-Canyon.com für Canyon Groin RAS, les orages des derniers jours on nettoyer le canyon mais pas pas de branches ou autres dans l'eau toutpasse. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2175/observations.html>)
