Sintesi: (traduzione alternativa) Short rappel canyon		
Idrologia:		
Accesso: (traduzione alternativa) At the traffic circle at Locarno airport, where the 4-lane access road (coming from Bellinzona) to Locarno begins, head north to the old Bellinzona-Locarno connecting road. At the next traffic circle turn right onto this road and 850 m further on turn left to the school center in Riazzino. Go up the road on the right in front of the school center and park the lower vehicle on the second parking level. Go down again with a second vehicle, turn right at the school center and 330 m further on turn right up the first road. After two switchbacks we meet a cross road that we follow to the right in the direction of Bugaro, Piandessio, Agarone. Before the bridge over the Pesta we can park the second vehicle on the left.		
Avvicinamento: (traduzione alternativa) Go back along the road for about 100 m and then turn right onto the footpath towards Peross. On steps go up the vineyard; then the path walks towards the stream incision. We open (and close) a door in the wire fence and about 30 m further on we turn right from the path onto a path that leads us into the streambed. If you have only 1 vehicle available, the access to the top starts directly at the parking lot (then 40 min.).		
Giro: (traduzione alternativa) Sequence of easy rappel. Good to combine with the neighboring Cugnasco inferiore, Carcale or Tenero. Also feasible when other canyons have too much water flow.		
Ritorno: (traduzione alternativa) After the last step, turn right out to the parking lot.

High water level for us, borderline. Nevertheless, a beautiful, varied tour. Water surprisingly warm. (traduzione alternativa)

Inspection as part of the "Meet, Work & Clean" (Bachab). Slippery in places. New anchors and traverser ropes set.
Especially the last cascades are sporty at this water level. (traduzione alternativa)

Automatisch importiert von Descente-Canyon.com für Canyon Pesta nice canyon, in the beginning of spring. Flow
was high the last part is a bit more technical with this flow (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22500/observations.html>)

A little slippery. Blocked by wood in two places. On the first rappel of the final cascade, an anchor is somewhat
hidden, we only discovered it in retrospect from the hanging position. (traduzione alternativa)
