Idrologia:		
Accesso: (traduzione alternativa) We leave the SS 33 (Gravellona - Domodossola), which goes up the Ossola valley, through the exit of Piedimulera and we go west on the SS 549 in the Val d'Anza towards Macugnaga. After 10 km (from the SS 33 exit) we reach the village of Molini, where we leave our car and continue on foot, turning left immediately after the village. Crossing the Torrente Anza, we go uphill on a narrow road for 850 m, then we come to a bridge over the Val Segnara.		
Avvicinamento: (traduzione alternativa) On foot we continue, turning left immediately after the village. Across the Torrente Anza, we go uphill on a narrow road for 850 meters, then cross the bridge and immediately down to the right to the stream.		
Giro: (traduzione alternativa) Quite wide cut gorge; somewhat slippery; when rappelling down the wall of the water drainage, the two pitons serve only as a belay to reach the valley-facing chain stand, which is not visible from above. The tour can be finished with a 13 m jump into the Torrente Anza.		
Ritorno: (traduzione alternativa) About 50 meters downstream in the Anza, then out to the right on a fishing path and upstream on the covered channel to the bridge. Cross the Anza and back to the car.

Our first canyoning tour in the Domodossola region in September 2021 had to be canceled due to heavy rainfall. The following day, our search for a suitable canyon led us to the Rio Segnara. It was a good choice! A scenic canyon. Extremely slippery in places! Video of the tour: <https://www.youtube.com/watch?v=aSkCFfBa16Q> (traduzione alternativa)
