<b>Specialità:</b>		
<b>Attrezzatura:</b> Corde: 2x30m		
<b>Sintesi:</b> (traduzione alternativa) Forest canyon in lush green and many rappel		
<b>Idrologia:</b> <a href="http://www.saihebro.com/saihebro/index.php?url=/datos/ficha/estacion:A270">http://www.saihebro.com/saihebro/index.php?url=/datos/ficha/estacion:A270</a>		
<b>Accesso:</b> (traduzione alternativa) From Pamplona in the direction of Huesca on the insofar 4-lane N 240. After about 16 km you reach the last exit before Monreal (and currently - 2008 - the last exit of the 4-lane road). Here turn off in southwestern direction (Otano, Esperun, Tiebas). After about 200 m on a narrow bolt-straight road you cross the Rio Elorz. Immediately after the bridge, turn left and go up the new Canal de Navarra to the hamlet of Yamo. Here park the lower vehicle. Helpful are the various maps of the 'geolocalisation' on the internet finding place with descente-canyon.com. The conventional access road to the canyon exit is still there, but after the road and canal construction work that has been done here, it is difficult to find and in 2008, in any case, not to be mastered with a normal car. With the second vehicle, we go back to the N 204 and continue (direction Huesca) to the next village. In Monreal one turns right and follows the signpost Higa. It crosses again the Rio Elorz (medieval bridge on the right). After that the path climbs. After a bend to the right, there is a left-hand serpentine (fenced property on the right). Here park the second vehicle (continue on the slope - 2008 - only with four-wheel drive).		
<b>Avvicinamento:</b> (traduzione alternativa) We follow the very evenly rising slope in a northwesterly direction. After some time it becomes steeper and suddenly turns almost 90 degrees to the southwest. Directly after this prominent bend, a large cairn (760 m above sea level) is found on the right at the edge of the slope. In front of this, clear tracks lead steeply downhill. Once a short steep step follows, which can be rappelled. One reaches the streambed directly at the 1st rappel and saves about 30 min. in the streambed, which the conventional access, which went further up from the slope, entailed.		
<b>Giro:</b> (traduzione alternativa) 22 rappel, in the upper part beautifully einheschnitten, after the C 30 forest canyon		

**Ritorno:** (traduzione alternativa)

After the last rappel out left and along the edge of the field further along the stream to the dirt road by the bridge (former location of the lower vehicle). Here turn left. The dirt road and the following path to Yamoz are part of the 'camino' to Santiago de Compostela. The pilgrim canyoneer takes the upper path at a fork, returning to the church in Yamoz.
